2017 Vermont Qualified Health Plans Rate Filing

Dear Mr. Hudson:

Attached for the Green Mountain Care Board's review and approval is Blue Cross and Blue Shield of Vermont's 2017 Vermont Qualified Health Plans Rate Filing.

Please let me know if we can answer any questions or provide further information during your review.

Sincerely,

Ruth Greene

Primary Contact Telephone Number: 1-(802)-371-3763
Primary Contact Email Address: schultzp@bcbsvt.com

1.3. Scope and Purpose

The purpose of this rate filing is to provide the rates and a description of the rate development for the Qualified Health Plans (QHPs) that Blue Cross and Blue Shield of Vermont (BCBSVT) proposes to offer for the 2017 benefit year.

This filing is intended to comply with the following laws:

- Vermont State Law 8 V.S.A. § 4062
- Vermont State Law 8 V.S.A. § 4512
- Vermont State Law 33 V.S.A. § 1806
- Vermont State Law 33 V.S.A. § 1811
- Vermont State Law 33 V.S.A. § 1812.
- DFR Order establishing tier rate structure and multipliers (Docket No. 13-002-I)
- Vermont Department for Children and Families Health Benefits Eligibility and Enrollment Rule, Sections 2.04 and 13.00
- Federal Regulation 45 C.F.R. Part 147
- Federal Regulation 45 C.F.R. Part 153
- Federal Regulation 45 C.F.R. Part 154
- Federal Regulation 45 C.F.R. Part 155
- Federal Regulation 45 C.F.R. Part 156
- Federal Regulation 45 C.F.R. Part 158
- Federal Regulation 26 IRC § 223

1.4. Proposed Rate Increase(s)

BCBSVT proposes an average increase of 8.2 percent.

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

1.5. Reason for Rate Increase(s)

The starting point of any renewal rate analysis is an assessment of actual to expected experience results. The basis for this rate filing is calendar year 2015 experience. That experience was much worse than expected in the 2016 rate filing, driving a 6.3 percent increase in 2017 rates:

- Allowed QHP claims were higher than expected, driving a rate increase of 1.5 percent.
- Benefit plans proved to be richer than expected, as measured by the ratio of paid claims to allowed claims. Reflecting this in our modeling of 2017 benefits had a 3.8 percent impact on 2017 rates. Paid claims are the product of allowed claims and paid-to-allowed ratio. Considerably unfavorable paid claims experience therefore increases rates by 5.4 percent.
- Vermont law defines groups of 51 to 100 as small groups starting in 2016. Such groups that have either already joined a QHP or are expected to do so had significantly worse than expected claims experience during 2015. Revising our assumptions to match current observations of the number and cost profile of these groups joining QHPs during 2016 pressures rates by an additional 0.9 percent.

In the absence of mandated changes associated with the Affordable Care Act, a 9.1 percent increase would have been requested. In addition to the experience impact, various assumptions drive the balance of the increase:

- An estimate of increases in the amounts providers are paid was included in 2016 QHP rates. Increases that have already occurred in 2016, or that are projected to occur before the end of 2016, drive a premium decrease of 0.4 percent by virtue of being lower than those assumed in the 2016 filing.
- Amounts that providers are paid are expected to increase in 2017, with a premium impact of 4.0 percent. This includes a 1.6 percent premium increase due to increases in the wholesale price of prescription drugs and a 2.4 percent premium increase due to payments to providers of medical services.
- The new pharmacy contract BCBSVT has negotiated with its Pharmacy Benefit Manager reduces the premium by 0.9 percent.
- BCBSVT assumes that members who have or will enroll in our QHPs in 2017 will prove to be healthier on average than those insured during calendar 2015, either in QHPs or individual and small group products. This assumption creates a premium decrease of 1.6 percent.
- During 2015, BCBSVT completed an extensive cost accounting study. The administrative expense projection reflects this new allocation. After offsets for continued membership growth, the exclusion of one-time charges and an expected decrease in administrative costs due to expanded opportunities for members to enroll directly with BCBSVT, the increase in administrative costs per member per month increased premium by 0.9 percent. BCBSVT administrative expenditures for members included in this filing remain below seven percent of premium.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

- A contribution to reserves (CTR) is required in order to maintain an adequate level of surplus. Surplus is a critical consumer protection required by financial regulation to assure health care system stability for QHP members. A long-term CTR of two percent represents an adequate, yet not excessive, contribution to reserves. CTR at this level allows BCBSVT to manage short-term fluctuations in order to maintain Risk-Based Capital (RBC) levels that are within our established, modest target range. While a contribution to reserves of 3.8 percent would be required to maintain RBC in light of 2017 premium and membership increases, BCBSVT believes that CTR should be managed to an adequate long-term level rather than fluctuating significantly from year to year with changes in membership and health care cost trend. For this reason, we have continued to file a CTR of 2.0 percent for 2017. As this is greater than the CTR approved by the Green Mountain Care Board for 2016 QHP rates, this has the effect of increasing premiums by 1.0 percent.
- Other adjustments to the assumptions used in the 2017 rate development cumulatively have the effect of reducing the required rate increase by 0.3 percent.

Mandated changes associated with the Affordable Care Act combine for a net decrease to premium of 0.8 percent:

- The federal government assessed a charge on all health plans to subsidize QHP coverage for the three year-period between 2014 and 2016, through its Transitional Reinsurance Program. The subsidy will be eliminated in 2017, requiring groups and members to pay 2.3 percent more for their coverage. This is more than offset by a temporary suspension of the Federal Insurer Fee for 2017, resulting in a combined premium reduction of 0.4 percent.
- Some deductibles, out-of-pocket maximums and co-pays in QHPs remain unchanged from 2016 to 2017. As overall costs increase and the amounts that members pay in cost-sharing contributions stay the same, more of the total cost is transferred to premiums. This has an impact of 1.6 percent on premium, offset by a 2.0 percent decrease due to plan changes implemented by BCBSVT and the State of Vermont for a net premium decrease of 0.4 percent.

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

2. PROPOSED BENEFITS

2.1. Description of Benefits

BCBSVT will be offering two types (Standard and Non-Standard) of QHPs in 2017. These plans include coverage for all Essential Health Benefits (EHBs). All QHPs are on the Exclusive Provider Organization (EPO) network and offer members access to a nationwide network of providers, including 92 percent the of providers in Vermont.

BCBSVT Standard Plans: BCBSVT is providing rates for the Standard Plans with benefits as approved by the Green Mountain Care Board, which are outlined in Exhibit 1A - "State of Vermont Standard Plan Designs." The Form filings for these products can be found under BCVT-130476826 for Non-CDHP plans and BCVT-130476866 for CDHP Plans.

BCBSVT Blue Rewards (Non-Standard) Plans: BCBSVT is providing rates for two health and wellness-based non-standard plan types that we have named Blue Rewards and Blue Rewards CDHP. Please see Exhibit 1B - "BCBSVT Blue Rewards (Non-Standard) Plan Designs" for details on the benefit structure. The Form filings for these products can be found under BCVT-130476860 for Non-CDHP plans and BCVT-130476879 for CDHP Plans. BCBSVT Blue Rewards plans also offer a Wellness program with incentives up to \$300 per year for each adult member for completing a health assessment, having a physical exam, setting a personal health goal or having a routine eye or dental exam. BCBSVT is introducing a new Blue Rewards Silver CDHP plan effective January 1, 2017.

Uniform Compliance

All of the renewing benefits are in compliance with 45 C.F.R 147.106. Specifically, all renewing benefits continue to be offered on BCBSVT's Exclusive Provider Organization (EPO) network and continue to cover the same service area. Some cost sharing levels were modified to maintain the same metal tier levels. Each product covers the same benefits except for the addition of Non-EHB benefits (described in section 3.8.3) which impacts each plan by 0.02 percent.

2.2. AV Metal Values

Standard plans are designed by the State of Vermont and offered by all issuers of QHPs. Please see *Attachment A - Standard Plans AV Certification - 2017* for the certification provided by the State.

Blue Rewards (Non-Standard) plans are designed by BCBSVT. The metal values included in the Unified Rate Review Template (URRT) were calculated using an alternate methodology, as allowed by 45 CFR §156.135. Multiple benefit designs offered in BCBSVT's Non-Standard plans are not supported by the AV Calculator. Please see *Attachment B - Blue Rewards (Non-Standard) Plans AV Certification - 2017*, for the actuarial certification, which includes the process used to develop the AV Metal Values.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

3. EXPERIENCE RATING

3.1. Experience Period Premium and Claims

The experience period used is 2015 experience of Blue Cross and Blue Shield of Vermont (BCBSVT) Individual and Small Group QHP products. This population will be the Single Risk Pool.

We used claims incurred January 1, 2015 through December 31, 2015 and paid through February 29, 2016. Both the paid claims and the allowed charges were completed using BCBSVT's monthly reserving models that underlie the financial statement reserves (best estimates before margin). These methods are subject to review by independent auditors and examination by Vermont Department of Financial Regulation (DFR). The claims used to develop the completion factors include a larger block of business than the experience period block. For the purpose of calculating completion factors, the reserving method categorizes claims by reporting/payment process (Local, BlueCard, Pharmacy, Medicare Supplement, etc.). Completion factors are calculated separately for each category. Using the larger block to calculate the Incurred But Not Reported (IBNR) claims reduces the variability of the projection. We also included an estimate of IBNR for the outstanding Pharmacy Rebates.

The paid claims and allowed charges come directly from claim records in BCBSVT's data warehouse. For Fee-for-Service claims, we combined plan payment with member cost sharing to calculate the allowed charges. For claims under a capitation arrangement, we combined capitation paid to the provider with the member cost sharing to generate allowed charges.

The table below shows details underlying the Incurred Claims and Allowed Claims (from URRT, Section I of Worksheet 1) for the Experience Period.

	Incurred Claims	Allowed Claims
Claims incurred and paid through December 31, 2015	\$293,712,993	\$386,004,072
Estimate of IBNR as of February 29, 2016 for Claims	\$1,399,309	\$1,417,075
Estimate of IBNR as of February 29, 2016 for Pharmacy Rebates	(\$2,786,937)	(\$2,786,937)
Total Claims	\$292,325,366	\$384,634,210
Member Months	766,083	766,083
Total Per Member Per Month (PMPM)	\$381.58	\$502.08

The experience period total allowed charges PMPM are \$502.08.

In the experience period, the earned premium was \$334,972,631. BCBSVT will not be required to pay MLR rebates for the 2015 calendar year.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

3.2. Benefit Categories

Medical claims are initially categorized into two categories based on the type of claim form the provider submitted: UB-04/CMS 1450 (Facility Inpatient/Outpatient) or HCFA/CMS 1500 (Professional/Other). Facility claims are then divided into the Inpatient and Outpatient categories in Worksheet 1, Section II of the URRT by the place of service listed on the UB-04 claim form.

Professional and Other medical claims are subdivided based on whether the provider is a medical professional or medical supplier as submitted on the HCFA 1500 claim form.

The prescription drug benefit category was populated for claims processed through our pharmacy benefit manager.

The capitation benefit category was populated with claims that run through our internal capitation system. The capitation category uses “Benefit Period” as a utilization description and the units represent the number of capitations in a given year.

3.3. Index Rate

The Index Rate is equal to the experience period allowed charges for EHB. As shown in section 3.1, the experience index rate is \$502.08.

To calculate the Projected Period Index Rate, we first excluded pharmacy rebates, BlueCard fees, and payments to the Blueprint program. These claims are not dependent on benefits and should not be subject to the projection factors described in the following sections. They will be added back into the Projected Period Index Rate (as described in section 3.4.6.).

BCBSVT has access to the detailed claims information underlying capitated claims and since capitated payments are routinely adjusted to target 100 percent of FFS claims, using the FFS equivalent represents the expected payment better than the capitation.

Dental and vision claims were removed in this step both because the projection factors described below do not apply to these benefits. See Section 3.4.4 for more details.

These adjustments are included in the “Other” factor in the section 2 of worksheet 1 of the URRT.

	Total Dollars	PMPM
Allowed Claims in section 1 of worksheet 1 of URRT	\$384,634,210	\$502.08
Remove BlueCard Fees	(\$1,305,040)	(\$1.70)
Remove Pharmacy Rebates	\$5,483,704	\$7.16
Remove Payments to Blueprint Program	(\$1,748,767)	(\$2.28)
Replace Capitation with FFS equivalent	\$352,623	\$0.46
Remove Dental and Vision Claims	(\$1,333,382)	(\$1.74)
Line A of Exhibit 5	\$386,083,348	\$503.97

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

3.4. Projection Factors

3.4.1. Change in the Definition of Small Group

As of the first renewal date on or after January 1, 2016, the Vermont definition of Small Group changes to include groups with 51-100 employees. These groups can either offer QHPs or move to a self-funded alternative. To calculate this factor, we included groups that had already joined the QHP line of business and groups that had already informed us that they intended to offer a QHP upon their 2016 renewal. For groups with non-calendar plan years that have neither joined QHP nor informed us of their intentions, we assumed that only groups that would realize lower premiums by choosing QHPs would join the risk pool. We included these claims and member months in all of the factors described below.

	Single Risk Pool	Groups with 51-100 employees offering QHP in 2016	Groups with 51-100 employees expected to offer QHP in 2017	Total
Experience Period Allowed Claims	\$386,083,348	\$25,727,986	\$4,425,372	\$416,236,706
Experience Period Member Months	766,083	43,108	7,442	816,633
PMPM	\$503.97	\$596.83	\$594.65	\$509.70

The factor (1+b₁ on Exhibit 5) to adjust for the change in the definition of Small Group is $\$509.70/\$503.97 = 1.0114$.

3.4.2. Membership Projections

As of March 2015, BCBSVT had 70,423 members enrolled in a QHP product, either individually through Vermont Health Connect or directly as individual or small group employees.

We used this information to project the 2017 QHP enrollment and the distribution by plan. As described in the previous section, BCBSVT expects that a portion of its current enrollment in groups with 51-100 employees will purchase QHPs. We projected their choice of product to be that most similar to their current product offering.

The Vermont Department of Health Access (DHVA) is in the process of requalifying all Medicaid enrollment. Any Vermonter who loses their Medicaid coverage would be eligible for a special enrollment period and allowed to join a QHP. Based on preliminary results from DHVA, approximately 18 percent of the 81,300 adults currently enrolled in Medicaid would no longer be eligible. We estimate that 50 percent of these members will enroll in a QHP, in the same proportion as current QHP enrollment by issuer. Since BCBSVT currently has 90 percent of the QHP market, we estimate that 6,500 members previously in Medicaid will join by January 2017.

This membership assumption has impacts on many other assumptions. Throughout the balance of the Actuarial Memorandum, the projection factors other adjustments will include the effects of this increase in membership. We will include the impact on projected claims in 1+b₃ on Exhibit 5. Since we are assuming that all of these new members will continue to be subsidized and enroll

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

in a Silver plan, the impact of the change in distribution by plan will be reflected in 1+b₆ and 1+c₁ of Exhibit 5. The increase in membership with projected claims higher than the average will also impact the projected risk adjustment transfer payment. Finally, the administrative charges will reflect the projected increase in membership and its impact on fixed costs. It should be noted that the overall rate impact of adding these members, based on the assumptions in this filing, is expected to be less than 0.1 percent, and that this rate impact is not sensitive to the total number of additional members who enroll after losing Medicaid eligibility.

The total member months expected to be covered by this filing is 930,456.

This projected membership was also used to adjust our Index Rate for demographics, morbidity, benefit changes, and other allowable adjustments described below.

Details of the projected membership breakdown by plan and market are on Exhibit 2A.

3.4.3. Changes in the Morbidity of the Population Insured

Our experience period is based on calendar year 2015. It includes members that enrolled in a QHP with BCBSVT during 2015, are expected to enroll in a QHP with BCBSVT upon the renewal date of their group plan, or canceled. Canceled members can be divided into two categories, voluntary cancelation and cancelation due to death. Voluntary cancelations can be further broken down by aging out, cancellations from normal group turnover, and individual cancellations. Individuals aging out are captured in our demographic adjustment (see section 3.4.5), while we assume that group turnover leads to the hiring of similarly-situated individuals; therefore, we only adjust for the impact of individual cancellations.

We split the experience claims costs based on these categories in order to compare the different populations. We used the allowed charges from the experience and adjusted for the change in network (see section 3.4.6 for details on this adjustment) and the change in the definition of Small Group previously described in section 3.4.1. We adjusted the experience period claims cost to reflect the average claims cost of members who did not voluntarily terminate prior to 2015.

	Voluntary Cancelation in the Individual Market	All Other Members	Total
Experience Period Allowed	\$24,969,529	\$390,735,060	\$415,704,589
Member Months	40,990	775,643	816,633
PMPM	\$609.16	\$503.76	\$509.05

The factor (1+b₉ on Exhibit 5) to adjust for the change in pool morbidity is $\$503.76 / \$509.05 = 0.9896$.

We also adjusted the projected allowed charges (1+b₃ on Exhibit 5) for the impact of members previously enrolled in Medicaid joining QHP. We assumed that these members would have claims levels similar to members enrolled in a subsidized QHP in 2015. See Exhibit 2B for details.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

3.4.4. Changes in Benefits

We included two factors to account for the change in benefits. The first one, (1+c₁ line on Exhibit 5), represents the anticipated change in the average utilization of services due to the change in average cost sharing in QHP products compared to the experience period products. To calculate this factor, we first calculated the average modeled paid to allowed (PA) ratio for the benefits in the experience period and the paid to allowed ratio for the benefits in the projection period. We then apply an induced utilization factor to each PA ratio and weight it on membership. The induced utilization (IU) factor is calculated by using the HHS formula where $IU = (PA)^2 - (PA) + 1.24$.

Calculation of the Impact of the change in benefits	
Experience Period Average Utilization Factor	1.0918
Projected Period Average Utilization Factor	1.0763
Benefit Adjustment (1+c ₁ on Exhibit 5) = 1.0763/1.0918	0.9859

The second factor is for additional Essential Health Benefits that now have to be included. This includes Pediatric Vision and Pediatric Dental Benefits. These benefits are for members age 21 and younger.

For the Pediatric Vision benefit, the experience allowed claims cost was \$0.50 PMPM. We do not expect this cost to be different in the projection period. This cost is included in the buildup of the Projected Index Rate (Exhibit 5, line e₆). We assumed that vision benefits would have the same paid to allowed ratio as the base benefit.

For the Pediatric Dental benefit, the experience allowed claims was \$1.62 PMPM, which was 8.3 percent higher than the 2014 experience period. In previous filings, Milliman performed the calculation of the expected claims by trending claims experience by 5 percent. We selected a trend assumption that was the midpoint of our experienced trend and this national benchmark. Using a 6.7 percent annual trend, we calculate the overall expected allowed charges at \$1.84 PMPM. For benefits in force in the experience period, we are using the actual paid to allowed ratio to estimate the paid claims. For new benefits or benefits without experience, we are using the relationship between the overall medical and pharmacy paid to allowed ratio and the dental paid to allowed ratio to derive the estimated paid claims. This cost is included in the built up of the Projected Index rate (Exhibit 5, line e₇). See Exhibit 2C for details.

3.4.5. Changes in Demographics

To develop the change in demographic factor (factor 1+c₃ on Exhibit 5), we again used Milliman’s Health Cost Guidelines (2014) age-gender factors. We applied these factors to both the experience membership and the projected membership, excluding members previously on Medicaid, and compared the average factors. See details of the experience and projected population on Exhibit 2D.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

Calculation of the Demographic Adjustment	
Experience Period Average Age-Sex Factor	1.2206
Projected Period Average Age-Sex Factor	1.2277
Demographic Adjustment (1+c ₃ on Exhibit 5) = 1.2277 / 1.2206	1.0058

3.4.6. Other Adjustments

The buildup of the Projected Index Rate also includes a factor for the change in provider networks, a factor to reflect new pharmacy contracts, a factor to reflect the impact of selection on allowed costs, a factor to reflect the impact of the expected settlement with VHC, and adjustments for non-system claims¹.

We adjusted our experience period for the change in provider networks (factor 1+c₂ on Exhibit 5). BCBSVT’s 2017 QHPs are offered on our EPO Network. All of the QHP experience used was on the EPO Network but some of the groups with 51-100 employees that are expected to be in a QHP in 2017 had claims that came from one of three different networks: BCBSVT’s Non-Managed network (PPO/Indemnity), BCBSVT’s Managed network (VHP/EPO) and The Vermont Health Plan’s (TVHP) network. All three of these networks have different contracts with different reimbursement schedules. Using the historical contracted reimbursement schedules, we calculated network factors that represent the different contracts. Using these factors, we can adjust our projected allowed changes to represent the contract that will be effective in 2017. See details on Exhibit 2E.

BCBSVT entered into a new contract with its pharmacy benefit manager, ESI, on July 1, 2015. In the previous filing, the impact of the change in contract between the experience period and the projected period was embedded in the pharmacy cost trend. For this filing, we have removed the contract adjustment from the trend assumption and included a separate factor in the buildup of the projected index rate. To calculate this factor, we applied the contracted discounts and dispensing fees for each type of drug (Generic, Brand and Specialty) to calendar year 2015 claims for both the experience period and the projected period contract provisions. The contract adjustment factor for each type of drug, calculated by taking the ratio of the projected pharmacy claims under each contract, was applied to the projected pharmacy claims (see Exhibit 3H for details). The adjusted projected pharmacy claims were then added to the projected medical claims to calculate the overall impact of the contract changes, as shown on Exhibit 3I and on line 1+c₅ of Exhibit 5.

Subscribers will make financial decisions that are right for them. Typically, this manifests itself in healthier subscribers selecting low-cost plans while less healthy subscribers select richer benefits. While we do not reflect selection in the plan-level adjustments, as per the instructions, it can be demonstrated that total premium will be understated without adjusting the index rate to spread the impact of selection across all plans (see Exhibit 2F). This is due to the plan share of allowed costs being greater for richer plan designs, which demonstrably experience antiselection in excess of benefit richness adjustments. The top section of Exhibit 2F

¹ Non-system claims are payments that are not processed through the claims adjudication system.

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

shows the build-up of paid claims from allowed charges using actual plan-level adjustments described in Section 3.8 of this Memorandum. The bottom section of the same exhibit demonstrates the impact on total paid claims of using benefit richness adjustments that instead reflect actual 2015 QHP experience. The ratio of weighted average projected paid claims calculated via each of these two approaches produces a factor that must be included in the index rate so that application of the various plan-level adjustments results in the correct total paid claims across all plans.

In the fall of 2015, VHC agreed to pay BCBSVT for 2014 claims for which members at had been retroactively cancelled instead of negatively impacting providers through adjustments to the claims. These claims were therefore not adjusted in our core system and are included in the experience for 2014. We project that a similar agreement will take place for 2015. Based on 2014 experience, we project that 0.5 percent of total claims will be reimbursed by VHC. This reduction in experience claims is reflected on Line 1+b₈ of Exhibit 5.

Other costs were added in the buildup of the Projected Index Rate to account for non-system claims (Items e₁-e₅ on Exhibit 5). As previous explained in section 3.3, these non-system claims are claims that are independent from the benefits.

- Pharmacy Rebates (e₁):
The experience period pharmacy rebates are estimated to be \$7.25 PMPM. This number is estimated using our contractual rebate guarantee since we have not yet received the details underlying the rebate payment for part of the 2015 calendar year. Pharmacy rebates are expected to trend at the same rate as Brand Drugs. As shown on Exhibit 3H, the projected trend for Brand drugs is 8.8 percent, which brings projected pharmacy rebates to \$7.89 PMPM.
- Blueprint Payments (e₂):
BCBSVT participates in the Vermont Blueprint for Health² program. The Vermont Blueprint for Health Manual, effective January 1, 2016, details the funding for both portions of the program: Community Health Teams (CHT) and Patient Centered Medical Homes (PCMH). The CHT funding is \$2.77 per patient per month (PPPM), where patients are members attributed to a PCMH. The PCMH funding was increased to \$3.00 PPPM with a maximum of \$0.50 of additional incentives for quality and performance on January 1, 2016. Based on Medicaid's projection for their population, we assumed that the average payment for PCMH would be \$3.25 PPPM.

The expected 2017 Blueprint payment (CHT+PCMH) is \$6.02 PPPM. Based on membership figures through March 2016, BCBSVT projects that 60.3 percent of the QHP membership will be attributed to a PCMH. The projected Blueprint payment is therefore \$3.63 PMPM.

- Interplan Teleprocessing System (ITS) (e₃):
The BlueCard® Program gives BCBSVT members healthcare coverage wherever they go across the country and around the world. The fees associated with this program are independent of the amount of the claims and therefore solely dependent on utilization of BlueCard participating providers. As described below, we believe that the medical annual utilization trend is 1.0 percent and therefore these fees are expected to increase at the

² <http://blueprintforhealth.vermont.gov/>

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

same rate. The experience period fees (\$1.80 PMPM) are projected to grow to \$1.84 PMPM in 2017.

- Vermont Vaccine Purchasing Program Payments (e₄):
The Vermont Vaccine Purchasing Program³ offers health care providers state-supplied vaccines at no charge by collecting payments from Health plans, insurers and other payers. This assessment is now based on a PMPM charge, which is a change from the previous year when it was based on claims. We applied the 2016 rates of \$10.73 per child and \$0.58 per adult to the experience period membership. The average PMPM for the experience period, \$1.88, was used as the expected cost for the projection period.
- Net Cost of Reinsurance (e₅): BCBSVT uses reinsurance to protect itself against very high claims. Included in the Projected Index Rate is the net cost (reinsurance premium less expected reinsurance claims) of reinsurance. This PMPM cost (\$1.32) was calculated in BCBSVT Large Group Rating Program Filing (BCVT-130453174).

3.4.7. Trend Factors (cost/utilization):

The source of the data is BCBSVT's data warehouse, except where noted below. To ensure accuracy of claims information, the data used has been reconciled against internal reserving, enrollment, and other financial reports. Claims incurred between January 1, 2013 and December 31, 2015, completed through February 29, 2016, were used in the analysis. Completion factors are applied to estimate the ultimate incurred claims for each period shown in the exhibits.

The data includes claims from the single risk pool and groups with 51-100 employees that either joined the single risk pool in 2016 or are expected to purchase QHPs in 2017 (as described in section 3.4.1). The data excludes members in the Individual Market who voluntarily cancelled (as described in section 3.4.3)

Medical Trend Development

Using the historical contracted reimbursement schedules, we calculated network factors that represent the different contracts. Using these factors, we can modify the claims to reflect only one contract. From there, we can observe the historical cost increases using all claims information.

Medical Trend is composed of three pieces: cost, utilization and intensity. In our analysis, we combine utilization and intensity within the utilization metric and analyze the unit cost separately. Historical experience is normalized for contract changes and then analyzed to derive a utilization trend in the absence of unit cost changes. Future unit cost trends are developed on a discrete basis, using the most recent round of contract negotiations as a starting point. The overall trend is the product of these two components.

Utilization

Contract changes for the entirety of the experience period were measured explicitly for each facility within our service area, as well as the three largest physician groups.

³ <http://healthvermont.info/hc/imm/VaccinePurchasingPoolPilotProgram.aspx>

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

Increases were measured for fee schedules and other chargemasters by applying each schedule to a market basket of services. The market basket was defined by using Current Procedural Terminology (CPT) codes & CPT modifier combinations that were present in each of the effective periods the schedules covered. Using the same experience period data used throughout the trend analysis, total allowed costs for the selected combinations of CPT and CPT modifier were compared under each schedule to estimate the percentage increase. For contracts under DRG arrangements, we compared the charge for the 1.000 DRG service for each period. Finally, for services under a discount of charge arrangement, we used the contracted chargemaster increase provided by our Provider Contracting department.

This accounted for about 82 percent of allowed claims dollars during the experience period. Costs for other claims are primarily for out-of-area services. Contracting changes for these claims were derived from the Fall 2015 Blue Trend Survey, which is a proprietary and confidential dissemination of the Blue Cross and Blue Shield Association.

Claims were normalized to the December 2015 contract at each unique provider by applying a factor equal to the product of the impact of each contracting change from the experience month through December 2015. The derived trend for other claims was assumed to be continuous. Please see Exhibit 3A for an illustration of this approach.

Shown on Exhibit 3B is the resulting array of allowed PMPM claims costs, before and after normalization for contract changes for the continuing members. We performed regressions on a number of periods. Results vary from -1.0 percent (most recent 36 months through December 2015) to +3.5 percent (most recent 24 months through December 2015). With the difficult start to the Exchange and the option to delay enrollment into a QHP until April 2014, the claims utilization in the last few months of 2013 were much higher than expected and the early months of 2014 were much lower than expected. This is skewing both the 24-month and the 36-month regressions, which is why we have decided to use the 18-month regression as a starting point.

Utilization is influenced by the richness of a product and, as shown on Exhibit 3C, when benefits get richer over time, the utilization will increase. To adjust for this phenomenon, we calculated the average induced utilization factor, based on the actuarial values of the plans in the experience and adjusted each month to reflect the benefits in place in December 2015. Utilization is also influenced by age. We adjusted the result for aging using the Milliman Health Cost Guidelines by calculating the average age-gender factors for each year included in the regression.

Calendar Year	Member Months	Average Age-Gender Factor	Aging Adjustment
2014	741,844	1.2165	
2015	803,735	1.2175	1.001

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

The utilization trend is 1.7 percent, calculated as follows:

Utilization Trend from Unadjusted Data	2.5%
Adjustment for Benefits (= 1.018/1.025)	0.993
Adjustment for Aging (= 1/1.001)	0.999
Adjusted Utilization Trend (= 1.025 x 0.993 x 0.990)	1.7%

Although we adjusted the regression to account for unexpected seasonal patterns in 2014, we believe that our utilization trend is still skewed upward by these patterns and potential up-take in 2015. We therefore selected 1.0 percent for the projected utilization trend.

Unit Cost

Unit cost trends were largely derived from observations of recent contracting and provider budgetary changes.

During calendar year 2015, about 53 percent of total claims dollars were provided by Vermont facilities and providers impacted by the hospital budget review process of the Green Mountain Care Board (GMCB). We have assumed that the GMCB would approve hospital budgets for October 1, 2016 and October 1, 2017 that support identical commercial increases as that approved for October 1, 2015. Based upon that assumption, the provider contracting and actuarial departments worked together to assess the impact such an increase would have on contract negotiations specific to the EPO network used for Qualified Health Plans. In addition to those increases, we made an adjustment to reflect the lower charges from Rutland Regional Medical Center starting on May 1, 2016⁴.

Similarly, we assumed for other providers within the BCBSVT service area that overall 2016 and 2017 budget increases would be identical to those implemented during calendar 2015. Again, the provider contracting and actuarial departments worked together to assess the impact these increases would have on contract negotiations specific to the EPO network used for Qualified Health Plans.

Finally, unit cost increases for providers outside the BCBSVT service area were derived from the Fall 2015 Blue Trend Survey, which is a proprietary and confidential dissemination of the Blue Cross and Blue Shield Association.

The results of the analysis are summarized in the below chart:

⁴ http://gmcboard.vermont.gov/sites/gmcboard/files/Meetings/Rutland_3_31_16_FY15_MidYearCheckIn.pdf

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

Annual Reimbursement Changes due to Budget Increases and Contracting Season

	Percent of Total Allowed Claims	FY 2016 Unit Cost Increases	Assumption to 2017	Total Annual Trend
Vermont facilities and providers impacted by GMCB's Hospital Budget Review	53.0%	4.2%	2.9%	3.5%
Other facilities and providers	47.0%	3.0%	3.2%	3.1%
Total	100.0%	3.6%	3.1%	3.3%

Overall Medical Trend

Our selected trend assumptions are 1.0 percent for utilization (including intensity) and 3.3 percent for unit cost increases, resulting in an overall medical trend assumption of 4.3 percent.

Pharmacy Trend Development

ESI has been the pharmacy benefits manager for BCBSVT since July 2009. The initial ESI contract was for a period of 3 years; a new contract became effective July 2012 and July 2015. As mentioned in section 3.4.6, in previous filings, we included the impact of contracting changes in the cost trend assumption. In this filing, we removed the contract adjustment from the cost trend calculation and added a factor to the overall trend calculation to account for the contracting changes. Accordingly, we based our cost trend calculation on Average Wholesale Price (AWP), which does not reflect contracted discounts, instead of contract-adjusted allowed charges as in previous filings.

With the emergence of new and expensive specialty drugs, as well as the increasing shift to generics as more brand drugs come off patent, we analyzed the components of trend (cost and utilization) separately for Brands, Generics, and Specialty drugs. We have projected the generic dispensing rate (GDR) based on the brand drugs that are scheduled to lose patent in the next few years. Specialty drugs are very high cost drugs with low utilization. Because of their relative infrequency, it is more appropriate to look at the overall PMPM trends for these drugs rather than separate cost and utilization components. The overall pharmacy trend is then calculated by combining the separate projections.

Non-Specialty Drugs

Exhibit 3D provides the monthly and the 12-month rolling data, along with the corresponding year-over-year and exponential regression trends, for non-specialty drugs. These are shown separately for the generic cost, brand cost, and overall non-specialty utilization categories. The number of days supply, rather than the number of scripts, is used to normalize for changes in the days supply per script (e.g. increased use of 90-day fills). Because there are several popular brand drugs that have become generic during the experience period, or will become generic during the projection period, we have combined the data for generic and brand drugs for the purpose of analyzing utilization patterns (the separate GDR projection is applied to the total

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

projected utilization to arrive at brand and generic components). The regressions use 24 data points on the monthly data, in order to best capture an adequate amount of the most recent history of drug costs. We selected the regressions for the period ending December 2015 for both Generic and Brand cost trend. For the utilization trend, we selected the 18 months regression for the period ending December 2015. As previously described for the medical utilization, with the difficult start to the Exchange and the option to delay enrollment into a QHP until April 2014, the claims utilization in the last few months of 2013 were much higher than expected and the early months of 2014 were much lower than expected. This is skewing the 24 months regression, which is why we have decided to use the 18 months regression as a starting point.

As described above, utilization trends should be adjusted for changes in benefits and aging. To calculate the impact of the change in benefit, we compared the utilization regression with and without the benefit adjustment for the period ending December 2015, as shown on Exhibit 3E. We then adjusted the utilization trend for aging.

The utilization trend is 1.4 percent, calculated as follows:

Utilization Trend from Unadjusted Data	3.5%
Adjustment for Benefits (= 1.015/1.035)	0.981
Adjustment for Aging (= 1/1.001)	0.999
Adjusted Utilization Trend (= 1.035 x 0.981 x 0.999)	1.4%

Although we adjusted the regression to account for unexpected seasonal patterns in 2014, we believe that our utilization trend is still skewed upward by these patterns and potential up-take in 2015. We therefore selected 0.5 percent for the projected utilization trend.

Based on our current distribution of days supply, for all members, and a list of brands expected to move to generic in the period during which these trend rates will be in effect, as provided by ESI, we estimate that GDR will reach 88.9 percent in the projected period, as shown on Exhibit 3F. It is important to note that care must be taken in projecting the GDR to avoid the simplistic assumption that generic shift will continue at historical levels. Generic conversion is a very discrete function - while specific dates for generic launches may be impacted by ongoing litigation, the list of brand drugs losing their patent protection is well-recognized in the industry. Furthermore, generic substitution protocols have increased generic substitution rates to well over 99 percent where such switches are clinically viable. For the above reasons, it would be actuarially inappropriate to base a future GDR assumption on a linear projection of past increases, which is why we have chosen to take a far more detailed, and more discrete, approach.

Utilization for brand drugs losing or expected to lose their patent protection from calendar year 2015 through the projection period is summarized by month. Because Average Wholesale Price (AWP) and effective discounts do not change significantly for most new generic drugs until the six-month exclusivity period has closed (that is, when the generic becomes “multi-source”), monthly utilization for the year ending December 2015 is projected through six months following each generic launch date (i.e. we assume the same days of supply in December 2016 as we had in December 2015, and so on). After that time, all utilization is expected to shift to generic. We

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

assume drugs with no generic exclusivity period will switch to generic immediately after the patent expires.

Specialty Drugs

The introduction of new specialty drugs for the treatment of hepatitis C in January 2014 required an adjustment to the trend calculation for specialty drugs. The high cost of the drugs skews the specialty trend, making it higher than we believe is warranted. Other high-cost or high-utilization drugs have also entered the market recently, such as Orkambi, a treatment for cystic fibrosis with an annual cost of almost \$250,000, and PCSK9 inhibitors like Repatha, used to treat high cholesterol in patients with the genetic disease familial hypercholesterolemia (FH). To accurately capture the effect of these new drugs on specialty trend, we removed their claims from the experience to calculate a trend rate to apply to these non-excluded claims. We trended those claims forward at the calculated rate for 27 months, then added back in our projections of claims for the new treatments (hepatitis C drugs, Orkambi, and PCSK9 inhibitors). We used the total restated projected claims to calculate a restated specialty trend.

Exhibit 3G, Page 1 shows the calculation of specialty trend both for all specialty drugs and for specialty drugs excluding the new treatments described above. For our regressions, we chose 24 points of 12-month rolling data to capture the most recent history of drug costs. Rolling 12-months regression is more appropriate for specialty drugs because of the low-frequency, high-cost nature of these drugs. The total specialty trend is 25.0 percent. Removing the large cost increases associated with the new treatments results in a 13.3 percent trend for the remaining specialty drugs.

For the same reasons stated above, we then adjust the results for aging. Using the Milliman Health Guideline factors, we calculated the average age-gender factors for the continuing population.

Calendar Year	Member Months	Average Age-Gender Factor	Aging Adjustment
2013	770,784	1.2019	
2014	741,464	1.2164	
2015	803,735	1.2175	= (1.2175/1.2019) ^{0.5}

To project the expected cost of hepatitis C treatment in the rating period, we began by looking at actual hepatitis C claimants in 2014 and 2015. Based on the actual claimants and estimates provided by ESI, we project 40 hepatitis C claimants in 2017

There are several different drugs available for the treatment of hepatitis C (Sovaldi, Viekira Pak, Harvoni, and Olysio are in our experience), but the only drug that will be on ESI's formulary in 2017 is Viekira. Viekira is available in 3- and 6-month treatments. In our experience, roughly 2/3s of claimants receive the 3-month treatment and 1/3 receive the 6-month treatment, so the average claimant receives four months of the drug.

In our previous filing, we had estimated the cost of four months of Viekira at \$72,000. This price was based on an expected discount due to the exclusivity arrangement between ESI and the manufacturer of Viekira. Viekira claims are now part of our experience with a monthly cost of

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

almost \$30,000. There is no discount reflected in the claim, however we do receive large rebates from ESI for Viekira claims. As drug rebates are credited to groups in a separate part of the renewal formula, we used the claim cost of \$30,000 per month in the trend development. At this cost, 40 claimants with an average treatment of four months have a projected 2017 cost of \$4.6 million.

PCSK9 inhibitors such as Repatha are used to treat high cholesterol. BCBSVT's current policy is to approve PCSK9 inhibitors for the treatment of familial hypercholesterolemia (FH), a genetic disease characterized by very high levels of cholesterol in the blood. Current incidence studies suggest that 200 persons per 100,000 lives are diagnosed with FH. Another indication for these drugs is for patients who have had a heart attack and then failed two different high-dose statins for 60 days. Based on current membership, we project 152 members will use a PCSK9 inhibitor in 2017. With an annual cost of about \$13,750, the projected total is \$2.1 million.

Orkambi is a drug used in the treatment of cystic fibrosis. In particular, it is used to treat a specific mutation of the disease that is found in roughly 50 percent of cystic fibrosis patients. Orkambi is prescribed to patients age 12 and older. We assumed that 50 percent of our members diagnosed with cystic fibrosis who are at least age 12 will take Orkambi. Orkambi has an annual cost of \$247,000 and we project 8 members will use it. The projected cost for those members is \$2.0 million.

One final adjustment to the projected specialty claims deals with a class of drugs called biosimilars. Biosimilars are functionally equivalent to biologic drugs, which are produced in a lab using recombinant DNA technology. Biosimilars have a lower cost than their equivalent biologic drugs. Humira, a biologic, was our highest cost drug in 2014. The FDA has recently approved a biosimilar for Humira that will be available sometime in the fall of 2016. For the 2017 projection period, we anticipate the cost of the biosimilar will be 10 percent less than the cost of Humira, which current cost \$4,200 per month. We will not be requiring existing Humira patient to switch to biosimilars but intend to direct new patients to the biosimilars. Based on recent data, the number of patients on this drugs has been fairly stable, which on average three patients no longer needing the drugs each month and three new patients each months. In December 2015, we had 81 members who filed a script for Humira. Assuming that we will start to direct new patients to biosimilars in September 2017, we expect 378 of the 972 projected Humira scripts to instead be biosimilar, which will result in a \$158,200 reduction in claims.

To calculate the effective trend, we started with the pharmacy claims from the calendar year 2015 removed the claims for hepatitis C drugs, PCSK9 inhibitors, and Orkambi. We then trended the remaining claims at a 12.6 percent rate for 24 months and added the incremental cost of hepatitis C treatments, PCSK9 inhibitors, and Orkambi for a total restated projected claims. Using this method, the restated effective specialty drug trend is 17.7 percent. See Exhibit 3G, Page 2 for details.

Overall Pharmacy Trend

For this filing, we have removed the contract adjustment factor from the cost trend assumption and included it as a separate factor in the index rate calculation (see section 3.4.6).

Exhibit 3H summarizes the trends calculates our total allowed pharmacy trend as 10.2 percent.

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

Overall Total Trend

To adjust the Experience Period Index Rate for the trend factors described above, we started with the experience period claims, adjusted for changes in network and impact of the change in the Small Group definition, and applied cost and utilization to both Medical and Pharmacy claims. The resulting factors (1+d₁ and 1+d₂ on Exhibit 5) are calculated on Exhibit 3I.

3.5. Credibility of Experience

BCBSVT's experience period had 766,083 member months and is therefore fully credible.

3.6. Credibility manual rate development

Since BCBSVT's experience is fully credible, no manual rate was needed in the development of rates for the experience period EHB.

3.6.1. Source and Appropriateness of Experience Data Used: Not Applicable

3.6.2. Adjustments Made to the Data: Not Applicable

3.6.3. Inclusion of Capitation Payments: Not Applicable

3.7. Market Adjusted Index Rate

The Market Adjusted Index Rate (line H of Exhibit 5) is \$559.11. This is calculated by adjusting the Projected Index Rate (line F of Exhibit 5, \$560.66) for allowable market-wide modifiers described below.

3.7.1. Projected Risk Adjustments PMPM:

BCBSVT received a risk adjustment transfer for the combined market and paid out a risk adjustment transfer for the catastrophic market for the 2014 calendar year⁵. On March 18, 2016, CMS published an Interim Summary Report on Risk Adjustment for the 2015 benefit year⁶. Since Vermont was deemed Eligible for the interim report, we received preliminary information on the state averages and BCBSVT detailed information. Using those two sources of data, BCBSVT estimated the 2015 transfer payment. From the interim information, we noticed that our plan average liability risk score (PLRS) was lower than in 2014 in relationship to the average for the combined market. This is due to the PLRS for the other carrier in the market increasing at a more rapid rate than BCBSVT's PLRS. To project the 2017 transfer payments, we assumed that BCBSVT would continue experience lower PLRS due to the assumption that the other carrier is engaging in coding growth initiative. The projected overall risk adjustment receivable for 2017 is \$1,268,182, or \$1.36 PMPM.

Since the Market Adjusted Index Rate is on an allowed claims basis, we adjusted the net projected risk adjustment payment by the average paid to allowed ratio (from Exhibit 6C).

⁵ <https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/RI-RA-Report-REVISED-9-17-15.pdf>

⁶ https://www.cms.gov/CCIIO/Programs-and-Initiatives/Premium-Stabilization-Programs/Downloads/InterimRARReport_BY2015_5CR_031816.pdf

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

As described in the Final Notice of Benefits and Payment Parameters for 2017 rule (81 F.R. 12204), the per capita risk adjustment user fee, used to fund the HHS-risk adjustment program, is \$1.56 per enrollee per year.

The overall market-wide adjustment (line g₁ of Exhibit 5) for the risk adjustment program is (\$1.55) as shown on Exhibit 4.

3.7.2. Exchange User Fees

BCBSVT does not expect Vermont Health Connect to charge a user fee for 2017.

3.8. Plan Adjusted Index Rates

3.8.1. Plan Adjustment - Actuarial Value and Cost Sharing adjustment

This plan adjustment, as shown on Exhibit 6A, is reflected by two factors:

- Benefit Richness Adjustment
- Paid to Allowed Ratio

The experience used to calculate the benefit richness adjustment and the paid to allowed ratio is our calendar year 2015 data, adjusted by the network, changes in Small Group definitions and trend factors (1+c₂, 1+b₁, 1+c₂, 1+d₁, 1+d₂ of Exhibit 5). To better model family benefits, we only included members who maintained their tier type (Single versus Family) throughout the year. This adjusted experience was then used to model each plan. The model re-adjudicates claims by starting with the allowed charges and applying appropriate cost sharing for each service. The model generates the projected average paid claims for each benefit, which is used to calculate a paid to allowed ratio.

3.8.1.1. Benefit Richness Adjustment

The Benefit Richness Adjustment is the counterpart of the Change in Benefit projection factor (1+c₁ line on Exhibit 5) described in Section 3.4.3. This factor represents the different projected utilization for each plan based solely on benefit design. To calculate this adjustment, we first calculated a base paid to allowed ratio, to which the HHS formula for induced utilization was applied.

For this factor, we summarized the data described above by subscriber and re-adjudicated the claims for each plan to calculate a subscriber level paid to allowed ratio. We then applied the HHS Induced Utilization formula ($IU=AV^2-AV+1.24$) to the base paid to allowed ratio.

These factors were normalized using the projected membership to ensure that the total adjustment was 1.000. The plan level adjustment for benefit richness calculated by applying the benefit richness adjustment to vary by base benefit and 1.000 for non-system claims, pediatric dental claims, pediatric vision claims and market-wide adjustment. See Exhibit 6B for details.

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

3.8.1.2. Paid to Allowed Ratio

To calculate the paid to allowed ratio, we adjusted the starting allowed charges described in the previous section by the benefit richness adjustment and re-adjudicated the benefits. The paid to allowed ratio in previous filing represented a single member benefit applied to all members and was then adjusted by a family tiering factor to reflect the impact of family deductibles and out-of-pocket. In this filing, the paid to allowed ratio includes both components. We then added the additional EHB paid and allowed, and the non-system claims and market-wide adjustment amounts in both paid and allowed. Finally, we calculated the overall expected paid to allowed ratio. Please see details in Exhibit 6C.

Late in the day on May 9, 2016, we received an updated benefit design for the Standard Bronze CDHP plan. We estimate that this change would increase the paid-to-allowed ratio by 0.07 percent. Because of the timing of the announcement, we were not able to make changes with adequate peer review prior to filing (note that we have updated Exhibit 1A to reflect the final plan design). We consider this change to be de minimis, and therefore believe that the rates in this filing are adequate.

In the URRT, the Paid to Allowed Average Factor is the weighted average expected claims cost, including non-EHB benefit and excluding market-wide adjustments (\$446.42) divided by projected allowed charges (\$560.76). As shown in Section 3 of Worksheet 1 of the URRT, the paid to allowed average factor is 79.6 percent.

3.8.2. Provider Network, Delivery System and Utilization Management adjustment: Not Applicable

3.8.3. Adjustment for benefits in addition to the EHBs:

BCBSVT is removing an exclusion for routine circumcision. Based on recent information from the American Academy of Pediatrics, there is new evidence that “the health benefits of newborn male circumcision outweigh the risks but the benefits are not great enough to recommend universal newborn circumcision.”⁷ On the basis of this evidence, our Medical Directors have recommended that we add coverage for this procedure. Based on historical data from groups that had already removed the exclusion, we estimate the additional cost to be \$0.10 PMPM of allowed charges. Applying the same paid to allowed ratio to this benefit as to the EHB benefit, we calculate an adjustment of 1.0002, as shown on Exhibit 6A.

3.8.4. Impact of specific eligibility categories for the catastrophic plan

This plan adjustment includes two components of the impact of the specific eligibility categories for the catastrophic plan. Both of these adjustments are based on the eligible population. The eligible population includes Vermont residents that are under age 30 and residents age 30 and over who would find the lowest cost plan to be more than 8 percent of their income. We used our current enrollment in the Catastrophic plan as a proxy for eligibility and adjusted the projected members that would qualify under the hardship rule to account for the increase

⁷ <https://www.aap.org/en-us/about-the-aap/aap-press-room/pages/newborn-male-circumcision.aspx>

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

premiums. We project that 94.4 percent of the population eligible for this product will be under age 30.

To adjust for the eligible population, we first calculated the adjustment for the impact on the pricing actuarial value of the expected lower allowed charges of the group eligible to enroll in the catastrophic plan. This was calculated by splitting the experience used to calculate the Pricing Actuarial Value into two populations (Under and Over 30) and re-adjudicating for the catastrophic benefit. Using the projected eligible members as weights, we calculated that the overall expected allowed charges are 0.5717 of the total allowed charges. We then adjusted the paid to allowed ratio based on the weighted average paid to allowed ratio from both populations. This factor is 0.8798.

These factors were applied to the EHB portion of the Projected Period Index Rate. Because this adjustment doesn't impact the Non-System claims and Market Wide Adjustment, we calculated the Expected Claims cost and backed into the plan level adjustment for the impact of eligibility.

The total adjustment for the specific eligibility categories for the catastrophic plan is 0.5042. See Exhibit 6D for details.

3.8.5. Adjustment for distribution of the administrative costs

3.8.5.1. Administrative Expense Load:

BCBSVT Administrative Expense load was not initially calculated as a percent of premium adjustment. This adjustment is the sum of the following fees:

- **BCBSVT Base Administrative Charges**
To develop the Base Administrative Expenses PMPM, we used calendar year 2015 data from both individual and small group members enrolled in a QHP. During 2015, BCBSVT completed an extensive cost accounting study. The base administrative expenses reflect this new allocation and is reflecting the operating cost relating to membership in this filing. The starting PMPM for the base administrative charges is \$32.93 PMPM.

The QHP population is comprised of Individuals who have to enroll through the Vermont Health Connect (VHC) website and Small Groups who can enroll directly with BCBSVT. The experience period base administrative for Individual was \$37.97 PMPM compared to \$28.99 PMPM for members in Small Groups.

Starting in 2016, individuals who are not receiving subsidies can enroll directly with BCBSVT, either by phone, by mail or online. We project that for 2017, 7,500 members will elect to enroll directly with BCBSVT.

Since the projected mix between directly enrolled members and VHC enrolled members differs from that in the experience period, we have reduced the base administrative charges by 2.2 percent to reflect the different membership mix.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

	Enrolled through VHC	Directly Enrolled with BCBSVT	Total
Experience Member Months	336,288	429,765	766,083
Experience PMPM	\$37.97	\$28.99	\$32.93
Projected Period Membership	49,830	27,708	77,538
Projected PMPM			\$32.20
Impact			= \$32.20/\$32.93 = 0.9778

We have removed one-time expenses related to the resource augmentation of certain enrollment functions during calendar 2015, as we do not expect these expenses to recur in future years. This reduced base period expenses by \$0.33 PMPM.

The remaining charges (\$31.87 PMPM) are projected to 2017 using a 2.4 percent annual trend. This projection factor is intended to make reasonable but modest provision for increases in overall operating costs PMPM. We assume that personnel costs (wages and benefits) will increase by 3 percent annually, the budgeted wage increase for 2016, over the projection period. Other operating costs are assumed to remain flat. We have calculated that 78.4 percent of our administrative costs are for salaries and benefits. We are therefore increasing our projected administrative expenses by the weighted average of 2.4 percent per annum.

		BCBSVT Totals	Percent of Total
Employee costs:	$A = a_1 + a_2$	<u>\$41,155,334</u>	<u>56.1%</u>
Salaries and taxes	a_1	\$30,898,129	
Benefits	a_2	\$10,257,205	
Purchased services	B	\$20,832,680	28.4%
Other operating costs	C	<u>\$11,363,516</u>	<u>15.5%</u>
Total Administrative Expenses	<u>A + B + C</u>	\$73,351,530	100.0%
BCBSVT Personnel Cost	$A / (A + C)$		78.4%

An examination of historical administrative charges will show a decreasing trend in recent years, driven primarily by membership increases and non-recurring incremental cost and savings initiatives.

2017, we project an increase in total membership, mostly due to the new enrollment from Vermonters previously covered by Medicaid. We calculated enterprise-wide PMPM administrative charges with both experience period enrollment and projected 2017 enrollment, and found that charges decreased by 1.7 percent with the increase in projected enrollment. We assumed that variable costs represent half of the increase, and therefore applied a decrease of 0.8 percent to the base PMPM charges to account for the increase in membership.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

Summary of Base Administrative Charges Calculation

Experience Base Administrative Charges	A	\$32.93
Adjustment for Membership Mix	B	0.9778
Adjusted Administrative Charges	$C = A \times B$	\$32.20
Exclusion of non-recurring expenses	D	(\$0.33)
Adjustment for Projected Membership Increase	E	0.9915
Trend Projection (2 years)	F	1.0476
Projected Base Administrative Charges	$G = (C-D) \times E \times F$	\$33.10

- Charges for Outside Vendors

- CBA Dental and VSP Vision

These benefits are being administered by third party administrators. The administrative fees are charged for eligible members only. The ratio of eligible members to total members, based on the projected QHP population split between adult and child, was applied to get the per member per month charge.

- Health Equity

All QHP members are eligible for HRA and/or HSA Integration service. For plans with an HSA-compatible benefit design, we offer a service to integrate with the mechanics of depositing monies into Health Savings Accounts (HSA). All plans are also eligible for this service with Health Reimbursement Accounts (HRA). To calculate these fees, we used the experience of members that are already enrolled in this program and compared it to all members enrolled in a QHP plan in the first quarter of 2016.

- Blue Rewards Program

Under this program, BCBSVT will reward members with credits via a debit card for the following wellness activities:

- Completing an online health assessment
- Setting personal health goals online
- Having a physical exam
- Having a routine eye or dental exam

Based on participation projection from the Marketing and Product department, we estimate that the cost of this program to be \$2.32 PMPM for Blue Rewards plans only.

The total of these charges adds up to 6.9 percent of premium. The details of the administrative charges are on Exhibit 7A.

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

3.8.5.2. Profit (or Contribution to Reserves) & Risk Margin:

- Contribution to Reserves

The filed rates include a two percent contribution to reserves (CTR). A contribution to reserves is required in order to maintain an adequate level of surplus. Surplus is a critical consumer protection that allows subscribers to receive needed care and providers to continue to receive payments in the event of unforeseen adverse events that may otherwise impact BCBSVT's ability to pay claims. We believe that a long-term CTR of two percent represents an adequate, yet not excessive, contribution to reserves. CTR at this level allow us to manage short-term fluctuations in order to maintain Risk-Based Capital (RBC) levels that are within our established, modest target range.

As demonstrated in section 1 of Exhibit 7B, a contribution to reserves of 3.8 percent would be required to maintain RBC levels in light of increases in total claims costs in QHP products during 2017. While increases due to per member per month claims costs alone would require a lower CTR (approximately 1.7 percent for this filing), anticipated membership increases resulting from the State's Medicaid eligibility reverification yield a substantially higher total premium estimate, and therefore a higher CTR requirement.

BCBSVT believes that CTR should be managed to an adequate long-term level, rather than fluctuating significantly from year to year with changes in membership and health care cost trend. For this reason, we have continued to file a CTR of 2.0 percent for 2017. It is our expectation that our future filings will also include a 2.0 percent contribution to reserves. While this amount may exceed or fall below that required to maintain RBC in any given future year, maintaining an adequate long-term assumption will allow us to avoid rate shocks in years of expected high growth in membership, such as 2017.

Furthermore, an adequate long-term contribution to reserves should exceed the minimum required to keep pace with increases in total claims costs. While best estimate assumptions are by definition expected to lead to equal likelihood of gains and losses, unexpected events or periods of sustained losses may lead to financial deterioration of sufficient magnitude to render a company insolvent. This is the basic tenet of classical ruin theory.

There are many examples of risk to surplus. The rating cycle is 24 months in duration, meaning that rate deficiencies may persist for an extended period in an increasing trend environment. Regulatory action can have a meaningful impact on surplus when required rate increases are not approved. Membership growth creates a need for additional RBC, much in the same way as trend. Finally, unusual events such as a flu epidemic or new technology may create a one-time shock to capital. A relevant example of the latter is the ongoing development of very expensive but clinically effective specialty pharmaceuticals. Should such a medication become widely prescribed, the cost could immediately bring us below our target RBC range. While we choose not to recognize the non-zero probability of such events directly in our pricing, it is necessary to include a sufficient margin for contingent events in CTR such that RBC can be maintained within the target range established in conjunction with state regulators.

Maintaining an adequate RBC level is critical for any insurer. Consequences of low RBC include reduced flexibility in responding to customer needs, a need for higher margins in rates in order to avoid further deterioration, and a reduced ability to attract or retain business or to handle

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING ACTUARIAL MEMORANDUM

membership growth. Stability is particularly important in times of unprecedented change, such as the continuing evolution of Vermont Health Connect and the health care reform environment.

BCBSVT must remain financially strong in order to continue to provide Vermonters with outstanding member experiences, responsible cost management and access to high value care. We are therefore filing for a 2.0 percent contribution to reserve, which represents the long-term level necessary to maintain Risk-Based Capital (RBC) levels that are within our established, modest target range in the face of short-term membership and/or health care cost trend fluctuations.

- Other Risk Margin:

Under the ACA, enrollees who are receiving APTC have a three month grace period to pay premiums, and enrollees who are not receiving APTC have a one month grace period. For both these populations, the State requires the insurer to pay for claims incurred in the first month of the grace period even if premium is never collected. This uncollected premium is considered bad debt. To ensure that BCBSVT collects enough premium on the total pool to cover the 30-day grace periods, we need to include a risk margin for bad debt of 0.25 percent.

Details of Contribution to Reserve and Risk Margin for Bad Debt by product are on section 2 of Exhibit 7B.

3.8.5.3. Taxes and Fees:

The proposed rates include on average 0.9 percent in Taxes and Fees. These taxes and fees are both from the State Government and the Federal Government.

The Health Care Claims Tax (HCCT) levied by the State of Vermont totals 0.999 percent of claims.

The fees collected by the Federal Government include Patient Centered Outcomes Research Institute Fee (PCORI) and the Federal Insurer Fee. The PCORI fee is estimated at \$2.35 per member per year, or \$0.20 per member per month.

The Federal Insurer Fee is intended to help pay for some provisions in the Affordable Care Act. The Consolidated Appropriation Act of 2016 temporarily suspended this fee for 2017 only.

Details of the Taxes and Fees by product are on Exhibit 7C.

3.8.6. AV Pricing Values

As described in the 2017 Unified Rate Review Instructions, the AV Pricing Value “represents the cumulative effect of adjustments made by the issuer to move from the Market Adjusted Index Rate to the Plan Adjusted Index Rate”. These adjustments are described in detail in preceding parts of Section 3.8. See Exhibit 7D for details by product.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

3.8.7. Calibration

Age, Tobacco, and Geographic factors are not allowed in Vermont. Therefore no calibration is required.

3.8.8. Projected Loss Ratio

Per CMS instructions dated January 30, 2015, the MLR calculation will be performed at the combined market level with a minimum requirement of 80 percent. We project that the overall Loss Ratio, using the federally prescribed MLR methodology for the combined market, will be 90.9 percent. See Exhibit 8 for details.

3.9. Consumer Adjusted Premium Rate Development

The Consumer Adjusted Premium rates are displayed on Exhibit 9. Since rate factors for age and geography are not allowed in Vermont, the only adjustment is the application of rating tier factors. Vermont has predetermined the tier factors for QHP plans. Using those tier factors, our projected membership by tier and the average members per subscriber, we calculate that the contract conversion factor to convert from PMPM to Single Rate is 1.1107.

Rate Structure	Single	Couple	Adult + child(ren)	Family	Average
Vermont Tier Factors	1.000	2.000	1.930	2.810	1.4733
Tier weights	63.3%	19.7%	3.6%	13.4%	100.0%

Average Members per Subscriber	1.6364
Contract Conversion Factor	= 1.6364/1.4733 = 1.1107

The Consumer Adjusted Premium Rates are shown on Exhibit 9.

3.10. Small Group Plan Premium Rates

All Small Groups must renew on 1/1/2017 according to the combined market rules. BCBSVT will not file small group rates for Q2-Q4 2017.

4. ADDITIONAL INFORMATION

4.1. Terminated Products

BCBSVT will not be terminating any product prior to 01/01/2017.

4.2. Plan Type

Our plan type is EPO.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

4.3. Warning Alerts

There are no warning alerts in the Unified Rate Review Template.

5. RELIANCE AND ACTUARIAL CERTIFICATION

5.1. Reliance

For the metallic AV values of the standard plans we relied upon the certification provided by Julie A. Peper, FSA, MAAA, Director and Senior Consulting Actuary with Wakely Consulting. (Attachment A)

5.2. Actuarial Certification

The purpose of this rate filing is to provide the rates and a description of the rate development for the Qualified Health Plans that Blue Cross and Blue Shield of Vermont (BCBSVT) is proposing to offer in 2017. These calculations are not intended to be used for any other purpose. This memorandum documents the methodology used to calculate the AV Metal Value for each Qualified Health Plan offered by BCBSVT in 2017, the appropriateness of the essential health benefit portion of premium upon which advanced payment of premium tax credits (APTCs) are based, that the Index Rate is developed in accordance with federal regulations, and that the Index Rate along with allowable modifiers are used in the development of plan specific premium rates.

I, Paul A. Schultz, am a Fellow of the Society of Actuaries, a Member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform the work described herein.

In my opinion, the projected Index Rate is in compliance with all applicable State and Federal Statutes and Regulations (including 45 CFR 156.80 and 147.102), has been developed in compliance with the applicable Actuarial Standards of Practice, is reasonable in relation to the benefits provided and the population anticipated to be covered, and is neither excessive nor deficient. The calculations and results are appropriate for the purpose intended.

The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV, was calculated in accordance with actuarial standards of practice.

I have relied upon the certification of AV Metal Value provided by the State for Standard Plans, and attached hereto. Metal AVs for Blue Rewards (Non-Standard) Plans were determined using the AV calculator, or in accordance with the requirements of 45 CFR 156.135(b)(3), as described in the attached actuarial certification.

Data used in this filing were reviewed for reasonableness, but no audit was performed.

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
ACTUARIAL MEMORANDUM**

The Part I Unified Rate Review Template does not demonstrate the process used by the issuer to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for federally facilitated exchanges, and for certification that the Index Rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers.

Paul A. Schultz, F.S.A., M.A.A.A.
Chief Actuary
Blue Cross and Blue Shield of Vermont
May 11, 2016

BLUE CROSS BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING PLAIN LANGUAGE SUMMARY

Blue Cross and Blue Shield of Vermont (BCBSVT) is committed to the health of Vermonters, outstanding member experiences and responsible cost management for all of the people whose lives we touch. By pooling the populations covered by our products, we protect individuals from the unaffordable and potentially ruinous costs associated with significant illnesses or injuries. Our products promote preventive care, health maintenance and health improvement, and we have in place strong utilization management programs that support members who require medical care and assure that they have access to high value care while avoiding unnecessary costs.

BCBSVT also works with providers to dampen cost increases through reimbursement strategies that include incentives to both provide and properly manage care. BCBSVT's vision is a transformed health care system in which every Vermonter has health care coverage, and receives timely, effective, affordable care. None of this work is possible unless BCBSVT remains financially strong, and that requires that we be allowed to charge rates that cover the medical expenses of the populations we serve.

The purpose of this rate filing is to provide the rates and a description of the rate development for Qualified Health Plans (QHPs) that Blue Cross and Blue Shield of Vermont (BCBSVT) is proposing to offer effective January 1, 2017.

There are 42,527 contracts (70,423 members) currently enrolled in a BCBSVT QHP.

BCBSVT is proposing an average rate increase of 8.2 percent across all QHPs. Increases for specific QHPs range from 5.2 percent to 10.9 percent.

The starting point of any renewal rate analysis is an assessment of actual to expected claims cost experience results. The basis for this rate filing is calendar year 2015 experience. That experience was much higher than expected in the 2016 rate filing, driving a 6.3 percent increase in 2017 rates.

In the absence of mandated changes associated with the Affordable Care Act, a 9.1 percent increase would have been requested. In addition to the experience impact, various assumptions drive the balance of the increase:

- Amounts that providers are paid are expected to increase for the balance of 2016 and into 2017, generating a premium impact of 3.7 percent.
- The new pharmacy contract BCBSVT has negotiated with its Pharmacy Benefit Manager reduces the premium by 0.9 percent.
- An increase in administrative costs per member per month, driven largely by ongoing challenges coordinating with Vermont Health Connect, increased premium by 0.9 percent. BCBSVT administrative expenditures for members included in this filing remain below seven percent of premium.
- A contribution to reserves (CTR) is required in order to maintain an adequate level of surplus. BCBSVT believes that CTR should be based on an adequate long-term required level rather than fluctuating significantly from year to year with changes in total premiums. For this reason, we have continued to file a CTR of 2.0 percent for 2017, which

**BLUE CROSS BLUE SHIELD OF VERMONT
2017 VERMONT QUALIFIED HEALTH PLANS RATE FILING
PLAIN LANGUAGE SUMMARY**

is significantly lower than the amount required to maintain our current capital position relative to total QHP premium. Nonetheless, as this is greater than the CTR approved by the Green Mountain Care Board for 2016 QHP rates, this has the effect of increasing premiums by 1.0 percent.

- Other adjustments to the assumptions used in the 2017 rate development, including an assumption that that members who will enroll in our qualified health plans in 2017 will prove to be significantly healthier on average than those insured during calendar 2015, cumulatively have the effect of reducing the required rate increase by 1.9 percent.

Mandated changes associated with the Affordable Care Act combined for a net decrease to premium of 0.8 percent:

- The federal government assesses a charge on all health plans to subsidize QHP coverage for the three year-period between 2014 and 2016, through its Transitional Reinsurance Program. The subsidy will be eliminated in 2017, requiring groups and members to pay 2.3 percent more for their coverage. This is more than offset by a temporary suspension of the Federal Insurer Fee for 2017, resulting in a combined premium reduction of 0.4 percent.
- Some deductibles, out-of-pocket maximums and co-pays in QHPs remain unchanged from 2016 to 2017. As overall costs increase and the amounts that members pay in cost-sharing contributions stay the same, more of the total cost is transferred to premiums. This impact of 1.6 percent on premium was offset by a 2.0 percent decrease due to plan changes implemented by BCBSVT and the State of Vermont, for a net premium decrease of 0.4 percent.

BCBSVT started selling QHPs in January 2014. In its first two years, this line of business represented \$580 million of earned premium. Due to higher-than-expected actual claims and administrative charges, the line of business has incurred a cumulative loss of 0.6 percent. BCBSVT has not included any additional contribution to member reserves to offset this loss.

BCBSVT understands the importance of adequately funding our health care system, to keep it strong and accessible. Since the factors driving this rate increase are almost entirely driven by the cost and utilization of health care in Vermont, we believe that there is no way to further reduce these rates without underfunding the health care coverage on which Vermonters rely.

I HEREBY CERTIFY that I have reviewed the applicable filing requirements for this filing, and, to the best of my knowledge, the filing complies with all applicable statutory and regulatory provisions for the state of Vermont

RE: State of Vermont Actuarial Value Certification for 2017 Standard Plan Designs

Dear Dana:

This memo replaces an earlier version provided on February 29, 2016. The Internal Revenue Code for 2017 per § 223(c)(2)(A), released on May 3, 2016, stated that the individual maximum out of pocket (MOOP) limit for High Deductible Health Plans (HDHP) would remain unchanged from the 2016 limit at \$6,550. The prior memo included two bronze HSA plans with a MOOP of \$6,600, which was estimated based on the historical increase in the IRS limit over the last several years as the limit had not yet been released. This iteration of the memo updates these plans to have a MOOP equal to the IRS limit of \$6,550. In order to maintain compliance with the bronze metal tier, the deductible on both of these plans has been increased \$50.

The Affordable Care Act requires that health care coverage provided by issuers to non-grandfathered individual and small groups must cover all Essential Health Benefits (EHBs) and have Actuarial Values (AVs) that fall under the Platinum (90% AV), Gold (80% AV), Silver (70% AV) or Bronze (60% AV) tiers. The ACA allows for a 2% de minimis range around these target AVs. For example, any plan design that has an AV from 68-72%, would be considered a Silver plan. The Center for Consumer Information and Insurance Oversight (CCIIO) recently released the final 2017 Actuarial Value Calculator (AVC)¹ that issuers must use to determine the AV of a plan. While CCIIO anticipates that most plans will be able to use the AVC without modification, some plan designs will have features which are not supported by the AVC. In these instances, an actuary can either modify the inputs to most closely represent the plan design or an actuary can modify the results of the AVC to account for the features not supported by the AVC. An actuarial certification documenting the development of the AV for these plan designs is required.

The State of Vermont (State) is standardizing several plan designs that all issuers offering plans in the exchange, Vermont Health Connect, must offer. Issuers must offer the standard plan designs in the individual and small group merged market. One Platinum, one Gold, two Silver and two Bronze standard plan designs were developed for Vermont Health Connect. There is a traditional deductible plan at each of the four metal levels and a High Deductible Health Plan (HDHP) at each of the Silver and Bronze levels. For each of the Silver standard plan designs, the cost sharing reduction plan designs are also standard. Cost sharing reduction plan (CSR) designs were developed at each of the 73% (federal), 77% (Vermont specific), 87% (federal) and 94% (federal) AV levels.

¹ <http://www.cms.gov/CCIIO/Resources/Regulations-and-Guidance/index.html>

The State contracted with Wakely Consulting Group, Inc. (Wakely) to assist in the development of the standard plan designs. A list of the changes from the 2016 standard plan designs is in Appendix B. At a high level the changes for each base standard plan are:

- Platinum – changes made to the medical deductible, medical MOOP, drug MOOP, specialist copay, and preferred brand drug copay
- Gold – changes made to the medical deductible, drug deductible, medical MOOP, drug MOOP, specialist copay, and preferred brand drug copay
- Silver Deductible – changes made to the medical deductible, medical MOOP, drug MOOP, integrating the medical MOOP to a combined medical and drug MOOP, and specialist copay
- Bronze Deductible – changes made to the medical deductible, drug deductible, combined medical/drug MOOP, drug MOOP, and specialist and preferred brand copays
- Silver HDHP – changes made to the medical deductible and combined medical/drug MOOP
- Bronze HDHP – changes made to the medical deductible and combined medical/drug MOOP

For the Silver and Bronze HDHP plans, there are two options from which the issuers may choose one at each level, consistent with the 2016 standard plan designs. Beginning in 2016, the regulations² require that all individuals, even those in non-self only contracts, have an out of pocket limit no more than the single limit (\$6,850 in 2016 and \$7,150 in 2017). This impacts HDHPs where the aggregate MOOP application could require an individual to have out of pocket costs higher than the individual limit. Compliance with this regulation can be done by adjusting the family MOOP in two ways. The first option has an aggregate family medical MOOP with an embedded \$7,150 individual maximum. The second option has a stacked family medical MOOP. Both options comply with the federal regulations on individual maximum out of pocket costs. Since the first option has operational challenges, the issuers are allowed to choose one from either Option for the HDHP standard plans.

In addition to the standard plans, starting in 2016 the State of Vermont is requesting that issuers offer a Gold plan where the deductible and MOOP are set at the same amount. This means that once the deductible is met, the plan pays 100% of all services. Unlike the standard plans, it is not required that issuers offer this plan, but it is highly recommended. The issuer may determine the amount at which to set the deductible and MOOP, as long as they are equal and the resulting plan falls in the Gold tier. Since the amounts are to be determined by the issuers, these plans are not included within this memo.

Four of the standard plan designs (and the cost sharing reduction plan designs) have features not supported by the AVC and thus an actuarial certification is required. The remaining standard plan designs have features that may warrant an AV adjustment but no explicit adjustment or actuarial certification has been done for these plans. In developing these standard plan designs and the resulting actuarial certification, Wakely also followed applicable Actuarial Standards of Practice (ASOP) as detailed in Appendix C and including:

- ASOP No. 23 *Data Quality*;
- ASOP No. 25 *Credibility Procedures*; and
- ASOP No. 41 *Actuarial Communications*.
- ASOP No. 50 *Determining Minimum Value and Actuarial Value under the Affordable Care Act*

EXECUTIVE SUMMARY

A summary of Vermont's standard plan designs is in Appendix D. The Silver HDHP and both Bronze plans have design features that are both significant and not supported by the AVC. The Silver HDHP cost sharing reduction plan designs have similar features. The issuers that opt to offer pediatric dental would also have design features that could be significant and not supported by the AVC. While most plans have some subtleties in their design that are not supported by the AVC, CCIIO has stated and regulations dictate that modifications should be made only for substantial differences. The four potential substantial differences that Wakely considered include:

1. Family deductible and Maximum Out of Pockets (MOOPs). There are two common types of applications for deductibles and MOOPs, commonly referred to in Vermont as stacked and aggregate³. The data supporting the AVC is only at the member level, and thus most closely resembles the stacked application of deductibles and MOOPs. Most HDHP plans use the aggregate application of deductible and MOOPs which can significantly lower the AV since a family of two would need to accumulate to a deductible that is twice that of a single contract. Note that due to the new regulation in 2016, if the family MOOP is more than the single limit of \$7,150, the MOOP must either be stacked or there must be an embedded individual MOOP of \$7,150. Wakely had previously developed a model to account for aggregate family deductibles and has modified this model to account for stacked and embedded MOOPs for HDHPs. Thus, a specific adjustment has been made to the appropriate AVs for HDHPs.
2. Vermont implemented a statute (H.559 Sec. 32. 8 V.S.A. § 4089) for prescription drug deductibles and MOOPs. The requirement mandates, in part, that the MOOP for prescription drug costs in any plan design shall not exceed the minimum deductible amount for HDHPs per Section 223(c)(2)(A)(i) of the Internal Revenue Code of 1986 (\$1,300 and \$2,600 for individual and family coverage in 2017). The requirement also states that for HDHPs the cost sharing benefit for prescription drugs must start after the minimum deductible amount for HDHPs (same \$1,300 and \$2,600 for individuals and family coverage) is met, but the amount may be met with either medical or prescription drug claims. This means that for all HDHPs, for purposes of prescription drug coverage, the deductible is considered met when accumulated medical and drug claims reach \$1,300 for individual or \$2,600 for family, regardless of what the medical deductible amount is. Similarly, the MOOP for only drug claims (including amounts used to accumulate to the deductible) is \$1,300 or \$2,600, regardless of the amount of the overall MOOP which will include both drug and medical claims.

Since for an integrated deductible and MOOP, only one amount is able to be input in the AVC, the value of the lower drug deductible and MOOP cannot be modeled in the AVC. This statute has a

³ Stacked deductibles and MOOPs are typical in traditional deductible plans where the individual deductible and MOOP apply to each member of a contract and the family deductible and MOOP is used as a protection for contracts where multiple members have claims. For example, if the family MOOP is two times the individual MOOP but three members of a contract all would have reached their individual MOOP, it limits the family's liability to two times the individual MOOP.

Aggregate deductible and MOOPs are typical in HDHPs where all claims for all members of a non-single contract accumulate to the family deductible and MOOP. For two person or family contracts where only one member has significant claims, the member still must reach the higher deductible and MOOP amounts which makes the average member liability higher under an aggregate deductible.

significant impact on AV, particularly at the lower AV tiers where the difference between the medical and prescription drug deductible and MOOP is greater. Wakely had previously developed a model to account for Vermont's prescription drug regulation and thus, where appropriate, a specific adjustment has been made to the AVs using this model.

3. In the current market, most Vermont HDHPs waive the deductible for preventive prescription drugs. This is another plan feature not currently supported by the AVC. Wakely has not analyzed the exact portion of drugs this represents and this may vary by issuer. The impact to AV would only apply to drug costs that would normally be incurred prior to the member reaching the deductible. Any costs after the deductible is met and after the MOOP is met would be similar to the AVC. It is possible that this design feature could have a significant impact on the AV. However the impact of this benefit is likely not enough to warrant an additional analysis. Based on some high level estimates, Wakely believes the maximum impact to AV for this design feature is approximately 0.5% with the likely expected impact to be half of that. Since Wakely did not quantify the exact adjustment of the preventive drug difference for HDHPs, Wakely did not make a specific adjustment but did make sure that any AVs developed for HDHPs were at least 0.5% below the high end of the de minimis range in order to account for this increased benefit. It is expected that the impact for these drugs would be highest for the bronze plan where the deductible is highest and the impact would decrease as deductibles decrease (and AVs increase).
4. If a plan covers pediatric dental, starting in 2015 there can be no cost sharing for Class I (basic) pediatric oral health essential health benefits. Appendix E contains a list of the dental procedure codes that are classified as Class I and have no cost sharing. Pediatric dental is not explicitly reflected in the federal AVC. It is included as part of the "other" benefits which are assumed to have average cost sharing for the plan. The reduction in cost sharing for the Class I benefits will result in a higher AV than what is modeled in the AVC, particularly for the higher deductible plans. It is possible that this design feature could have a significant impact on the AV. Based on some high level estimates, Wakely believes the maximum impact to AV for this design feature is approximately 0.5%. Since this adjustment may apply to some issuers and not to others, Wakely did not make a specific adjustment but did make sure that any AVs developed were at least 0.5% below the high end of the de minimis range in order to account for this benefit. It is expected that the impact for these dental services would be highest for the bronze plan where the deductible is highest and the impact would decrease as deductibles decrease (and AVs increase).

There are other potential design features for which adjustments could be made. However, given the expectation that adjustments be made for only the most substantive deviations, Wakely does not believe additional adjustments are warranted. It is also important to note that the bucketing of claims and the methodology used to calculate the AVC are not always clearly defined. Thus, at times it is difficult to ascertain whether an adjustment is warranted and how that adjustment would be estimated.

As stated, Wakely made explicit adjustments to account for the aggregate family deductible/MOOP and Vermont's prescription drug regulation. These adjustments are described in detail in the Methodology section. For the preventive prescription drug and pediatric dental benefits, Wakely did not make an explicit adjustment but did allow room in the AV such that an increase of up to 0.5% would not result in the AV falling outside of the required range.

The table in Appendix F shows all plan designs for which adjustments were made, the adjustments considered, the original AV from the AVC, and the final adjusted AV. The pediatric dental consideration may also apply to the Platinum, Gold and Silver Deductible and CSR plans when issuers include the benefit but no explicit adjustment was made since coverage of the pediatric dental benefit is optional and the impact to higher AV plans is less significant.

METHODOLOGY

Since several of the standard plan designs have features not supported by the AVC, Wakely developed an HDHP model to capture the impact of these features on the AV. It was anticipated that the AVC would not accommodate all of the Vermont plan design features and this model was developed several months prior to the draft 2014 AVC being released. While there are similarities in the data used (for example, only group data is included in both models), there are also differences (for example, the HDHP model includes all members regardless of duration while the AVC includes only members who are enrolled the full 12 months).

If a plan does have substantive differences from what the AVC allows, there are two allowed approaches defined in the federal regulations. The first allows the actuary to adjust the inputs of the plan design to “fit” it into the AVC. The second allows the actuary to put in as many of the design features as possible into the AVC and then adjust the resulting AV to account for the unique design features. Wakely determined the second approach was most appropriate for the Vermont plan design differences. Thus for the plan designs where adjustments were made, Wakely first input as much of the plan design as possible into the AVC and then modified the resulting AV to account for the unique features.

The following discusses the HDHP model that Wakely developed and the process used to adjust the actuarial values from the AVC.

HDHP Model

Anticipating the need to quantify some of Vermont’s unique plan design features, in mid-2012 Wakely developed an HDHP model that would account for both aggregate deductibles and MOOPs as well as quantify the impact of Vermont’s prescription drug regulation. For the 2016 AV adjustments, this model was updated with more recent data and an option was added to account for embedded/stacked MOOPs.

In developing the model Wakely was provided with membership and medical and pharmacy claims data extracts from the Vermont Healthcare Claims Uniform Reporting and Evaluation System (VHCURES). Filters were then applied to the data to target a specific population for the model and reduce the amount of records to work with. The data used included:

- Allowed commercial medical and prescription drug data that was incurred in 2012
- Products types HMO (non-Medicare risk), PPO, POS and EPO
- Used claims with a Useflag='0'
- All market categories except individual
- Limited to members in select payer ids

After all filters were applied, the remaining data included allowed claims and membership for approximately 2.3 million member months.

The methodology developed for the HDHP model does not use the traditional approach of continuance tables. When determining the paid claims and resulting actuarial value of the plan designs where the prescription drug regulation is a factor, the order in which the claims occur is important. Continuance tables fail to recognize the impact of the order of the claims on actuarial values. Thus, the HDHP model re-prices the claims based on the inputs provided in the model rather than rely on continuance tables.

The HDHP model allows a user to enter the following:

- Medical and Prescription drug deductible amounts for both individual and family contracts. These amounts can differ but the model assumes the amounts are always integrated, or that both medical and drug claims will accumulate to both deductibles, even if different amounts.
- Medical and prescription drug maximum out of pocket amounts for both individual and family contracts. These amounts can differ and the model allows for different treatment of the MOOPs as noted below.
- Medical and prescription drug coinsurance amounts. If the plan design includes copays, an effective coinsurance needs to be input.
- The structure of the deductibles and MOOPs. As can be seen in the table below, the model can distinguish between aggregate and stacked deductibles and MOOPs. It also allows for different accumulations of claims to the medical and prescription drug MOOPs. There are six structural selections available in the model, described in the table below. Option 5 is most closely aligned to the federal AVC. Option 6 represents the design of the Vermont HDHPs. This changed from Option 1 due to the new federal regulations in 2016.

Options	Costs that Accumulate			Deductible / MOOP Type
	Deductible	Maximum Out-of-Pocket (MOOP)		
		Medical	Rx	
1	Medical & Rx	Medical & Rx	Rx Only	Aggregate
2	Medical & Rx	Medical & Rx	Rx Only	Stacked
3	Medical & Rx	Medical Only	Rx Only	Aggregate
4	Medical & Rx	Medical Only	Rx Only	Stacked
5	Medical & Rx	Medical & Rx	Medical & Rx	Stacked
6	Medical & Rx	Medical & Rx	Rx Only	Aggregate Deductible /Aggregate MOOP with Embedded Ind MOOP (can also be used for Stacked MOOP)

Adjusted AV Calculations

Using the federal AV calculator and the HDHP model as outlined above, the following methodology was used to develop the adjusted AV calculations for the HDHPs:

1. The plan designs were entered into the AVC ignoring the separate prescription drug deductible and MOOP thresholds. The resulting AV is the unadjusted value, which does not account for the prescription drug regulations or the aggregate family deductible and MOOP levels.
2. The HDHP model was used to determine the revised AV.
 - a. The same plan design input into the AVC was input into the HDHP model. The HDHP model only allows for coinsurance. Since the HDHP designs include copays, an effective coinsurance was developed for each plan design. The effective coinsurance amounts were developed separately for medical and prescription drug services using the allowed weights

and average cost per service from the federal AVC continuance tables for the relevant metal tier.

- b. The HDHP model was normalized to the AVC for each plan design. This means the same plan design, ignoring the prescription drug thresholds and assuming a stacked family deductible and MOOP, was input into the HDHP model and the underlying data was adjusted to arrive at the same AV as the AVC. This was done to ensure the same starting AV in both models and to try to mirror the induced utilization in the AVC. The normalization factors were reviewed for reasonability and deemed reasonable given they are accounting for trend, regional differences in cost and utilization and induced utilization.
 - c. The plan design in the HDHP model was adjusted to lower the prescription drug deductible and MOOP inputs (if applicable) to the appropriate plan design amounts and also to adjust the prescription drug MOOP to only consider prescription drug claims (the medical MOOP amount continues to use both medical and prescription drug claims). The application of deductible and MOOP was also changed to use an aggregate family deductible and either a stacked MOOP or an aggregate family MOOP with an embedded individual MOOP. For the stacked application of the MOOP, all individuals are subject to a MOOP equal to the individual MOOP in addition to the family MOOP. The aggregate family MOOP has an embedded individual MOOP equal to \$7,150.
3. The resulting AV from the HDHP model is used as the final AV for tier placement.

The HDHP model was intended only for HDHPs where medical and drug claims both accumulate to the deductible. The Bronze and Silver deductible plans (and associated CSR plans) need to be adjusted to account for the lower prescription drug MOOP, but the deductible plan has separate medical and drug deductibles. Thus, the HDHP model was used but with a slight variation in methodology. The following highlight the differences in methodology used only for the Bronze and Silver Deductible plans.

1. Same as for HDHPs, as much of the plan design as possible was entered into the AVC. This is the unadjusted AV. The Bronze and Silver Deductible plans then need to be adjusted for the lower and separate prescription drug MOOP.
2. The HDHP model was used to develop the AV adjustments in a slightly different process than for the HDHPs.
 - a. Instead of normalizing the HDHP model to the AVC, the normalization factor for the Bronze or Silver HDHP was used.
 - b. The HDHP model cannot accommodate plan designs where both medical and drug claims do not accumulate to the deductible. Thus, the same plan design was entered into the HDHP model as in the AVC but the model selection indicated that both medical and drug claims accumulated to the deductible amounts.
 - c. The HDHP model was then re-run with the lower drug MOOP and to adjust the prescription drug MOOP to only consider prescription drug claims (the medical MOOP amount continues to use both medical and prescription drug claims). The model continued to use a stacked application for deductible and MOOP since it is a traditional deductible plan.
3. The final AV is the ratio of the AV from 2c and 2b applied to the AV from the AVC in 1.

Appendix G includes screen shots from the AVC and the HDHP model for each plan design with an adjusted actuarial value. Also included is a summary of the AVs and in the instance of the Bronze and Silver Deductible plans, a calculation of the adjustment.

RELIANCES

We have relied on others for information used in the actuarial value adjustments. For the original AV, the final 2017 federal AVC model was relied on. While reasonability tests have shown there are some assumptions and methodologies that are not consistent with expectations, the AVC was developed for plan classification and not pricing. Thus, the model is being used as such and we make no warranties for the accuracy of the AVs that result from the AVC.

VHCURES data supplied by the state was used in the development of the HDHP model. We have reviewed the data for reasonableness, but have not performed any independent audit or otherwise verified the accuracy of the data/information.

DISCLOSURES AND LIMITATIONS

Wakely is financially and organizationally independent from the State of Vermont and any issuer in the state.

Wakely does not warrant or guarantee that actual experience will tie to the AV estimated for the placement of plan designs into tiers. The developed actuarial values are for the purposes of classifying plan designs of similar value and do not represent the expected actuarial value of a plan. Actual AVs will vary based on a plan's specific population, utilization, unit cost and other variables.

The distribution of this report to other users is limited to the State of Vermont and issuers within that state that will be submitting standard plan designs. Distribution to such parties should be made in its entirety. Distribution to other parties should only be made with Wakely's consent.

Exhibit A contains the formal actuarial certification. If you have any questions regarding this letter or the certification, please contact me.

Sincerely,

Julie A. Peper, FSA, MAAA
Partner and Senior Consulting Actuary

Brittney Phillips, ASA, MAAA
Associate Actuary

APPENDIX A

Actuarial Certification State of Vermont Actuarial Value of Standard Plan Designs Effective January 1, 2017

I, Julie A. Peper, am associated with the firm of Wakely Consulting Group, LLC. (Wakely), am a Fellow of the Society of Actuaries and a member of the American Academy of Actuaries, and meet its Qualification Standards for Statements of Actuarial Opinion. Wakely was retained by the State of Vermont to provide a certification of the actuarial value of the state's standard plan designs that are effective January 1, 2017 on Vermont Health Connect. This certification may not be appropriate for other purposes.

To the best of my information, knowledge and belief, the actuarial values provided with this certification are considered actuarially sound for purposes of § 156.135(b), according to the following criteria:

- The final 2017 federal Actuarial Value Calculator was used to determine the AV for the plan provisions that fit within the calculator parameters;
- Appropriate adjustments were calculated, to the AV identified by the calculator, for plan design features that deviate substantially from the parameters of the AV calculator;
- The actuarial values have been developed in accordance with generally accepted actuarial principles and practices; and
- The actuarial values meet the requirements of § 156.135(b).

The assumptions and methodology used to develop the actuarial values have been documented in my correspondence with the State of Vermont. The actuarial values associated with this certification are for standard plan designs (Silver HDHP, Bronze HDHP, Bronze Deductible, Silver Deductible, Silver HDHP CSR 73%, Silver HDHP CSR 77%, Silver HDHP CSR 87%, Silver HDHP CSR 94%, Silver Deductible CSR 73%, and Silver Deductible CSR 77%) that will be effective as of January 1, 2017 for individual and group coverage sold on Vermont Health Connect.

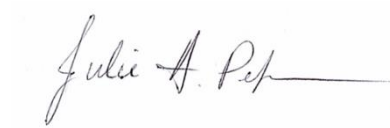

The developed actuarial values are for the purposes of classifying plan designs of similar value and do not represent the expected actuarial value of a plan. Actual AVs will vary based on a plan's specific population, utilization, unit cost and other variables.

In developing the actuarial values, I have relied upon the federal Actuarial Value calculator and data from the Vermont Healthcare Claims Uniform Reporting and Evaluation System (VHCURES). I did not audit the data provided; however, I did review the data for reasonableness and consistency.

May 9, 2016

Page 10

Actuarial methods, considerations, and analyses used in forming my opinion conform to the appropriate Standards of Practice as promulgated from time-to-time by the Actuarial Standards Board, whose standards form the basis of this Statement of Opinion.

A handwritten signature in cursive script that reads "Julie A. Peper" followed by a horizontal line.

Julie A. Peper, FSA, MAAA

APPENDIX B

Summary of Plan Design Changes from 2016 designs

		Deductible Plans	
Plan	Platinum	Gold	
Changes	Increase medical deductible to \$250 from \$150 Increase medical MOOP to \$1,300 from \$1,250 Increase pharmacy MOOP to \$1,300 from \$1,250 Increase specialist office visit copay to \$30 from \$20 Increase Rx preferred brand copay to \$50 from \$40	Increase medical deductible to \$850 from \$750 Increase pharmacy deductible to \$100 from \$50 Increase medical MOOP to \$4,500 from \$4,250 Increase pharmacy MOOP to \$1,300 from \$1,250 Increase specialist office visit copay to \$30 from \$25 Increase Rx preferred brand copay to \$50 from \$40	

		Deductible Plans	
Plan	Silver	Bronze	
Changes	Increase medical deductible to \$2,150 from \$2,000 Increase medical MOOP to \$6,000 from \$5,600 Increase pharmacy MOOP to \$1,300 from \$1,250 Integrate the medical MOOP to medical/Rx MOOP Increase specialist office visit copay to \$65 from \$50	Increase medical deductible to \$4,600 from \$4,000 Increase pharmacy deductible to \$700 from \$500 Increase medical/Rx MOOP to \$7,150 from \$6,850 Increase pharmacy MOOP to \$1,300 from \$1,250 Increase specialist office visit copay to \$90 from \$85 Increase Rx preferred brand copay to \$85 from \$80	

		HDHPs	
Plan	Silver - Embedded MOOP	Silver - Stacked MOOP	
Changes	Increase medical deductible to \$1,550 from \$1,425 Increase medical/Rx MOOP to \$6,400 from \$5,750 Increase embedded single MOOP to \$7,150 from \$6,850	Increase medical deductible to \$1,600 from \$1,550 Increase medical/Rx MOOP to \$6,400 from \$5,750	

		HDHPs	
Plan	Bronze - Embedded MOOP	Bronze - Stacked MOOP	
Changes	Increase medical deductible to \$5,050 from \$4,100 Increase medical/Rx MOOP to \$6,550 from \$6,500 Increase embedded single MOOP to \$7,150 from \$6,850	Increase medical deductible to \$5,300 from \$4,400 Increase medical/Rx MOOP to \$6,550 from \$6,500	

APPENDIX C

Comments Relative to Applicable ASOPs

This appendix includes comments relative to the following applicable Actuarial Standards of Practice (ASOP).

- ASOP No. 23, *Data Quality*;
- ASOP No. 25, *Credibility Procedures*;
- ASOP No. 41, *Actuarial Communications*; and
- ASOP No. 50 *Determining Minimum Value and Actuarial Value under the Affordable Care Act*.

ASOP 23: Data Quality

3.1 Overview – VHCURES data was used as the basis for the HDHP model and this data source was deemed reasonable for the analysis discussed in the management report.

3.2 Selection of Data - The data was considered reasonable for our analysis subject to the following considerations -

- a. The data sources contained all material data elements.
- b. The following considerations were reviewed as part of our analysis:
 1. Data was appropriate and sufficiently current. The data was for similar/same populations and the most applicable data set available.
 2. Data was reasonable and comprehensive of the necessary data elements.
 3. There were no known, material limitations of the data.
 4. No alternative data sets were reasonably available. The reliability of the data underlying our analysis did not require support from alternative data sets.
 5. Alternative data sets were not deemed necessary to complete the analysis.
 6. Sampling methods were not required.

3.3 Reliance on Data Supplied by Others - Reliance is discussed in the management report to which this appendix is attached.

3.4 Reliance on Other Information Relevant to the Use of Data - We relied on information contained in the report. We did not detect any material errors in the data provided and relied upon the data as part of our analysis.

3.5 Review of Data - We reviewed the data. Data definitions were included as part of the VHCURES data. Ultimately the data was reasonable with the adjustments discussed in our management report.

3.6 Limitation of the Actuary's Responsibility - We did not audit the data.

3.7 Use of Data– Use and adjustments to the data are discussed in this management report. In addition:

- a. We deem that the data are of sufficient quality to perform the analysis;
- b. The data did not require enhancement before the analysis could be performed
- c. The data was reasonable for the analysis and did not require adjustment beyond that discussed in the management report;
- d. We did not detect any material defects in any data source;
- e. The data were adequate to perform our analysis.

ASOP 25: Credibility Procedures

The HDHP model uses data as its starting point. The experience used is fully credible and therefore no credibility blending or adjustments were necessary.

ASOP 41: Actuarial Communications

This report and the actuarial memorandum submitted are consistent with the guidance in ASOP 41.

3.1 General Requirements for Actuarial Communications

3.1.1 Principal and Scope of Engagement – These results were developed to comply with § 156.135(b) and should not be used for any other purpose. The distribution of this report to other users is limited to the State of Vermont.

3.1.2 Form and Content – The State of Vermont was the principal for this engagement and the scope of the engagement included developing and certifying the actuarial values for the standard plan designs as discussed in the management report.

3.1.3 Timing of Communication – This report is provided in conjunction with the actuarial certification of the submitted actuarial values.

3.1.4 Identification of Responsible Actuary – The responsible actuary is identified in the attestation and this management report.

3.2 Actuarial Report – This management report is an Actuarial Report as defined in this ASOP. Correspondence between Wakely and the State of Vermont as part of this engagement should also be considered part of the Actuarial Report.

3.3 Specific Circumstances – No constraints apply beyond any discussed in the attachment management report.

3.4 Disclosures Within an Actuarial Report - all relevant disclosures have been made in the management report. Consistent with this ASOP, we make specific mention to the following items here:

3.4.1 Uncertainty or Risk – Uncertainty is discussed in the management report.

3.4.2 Conflict of Interest – Wakely is financially, organizationally, and otherwise independent from the State of Vermont and any reliant parties.

3.4.3 Reliance on Other Sources for Data and Other Information - Reliance regarding data and assumptions are discussed in this management report.

3.4.4 Responsibility for Assumptions and Methods - Assumptions and methods are discussed in the management report and the parties associated with the assumptions and methods have been delineated. Therefore, pursuant to this ASOP, no additional disclosure is necessary.

3.4.5 Information Date of Report -The management report list the applicable dates for the analysis and correspondence.

3.4.6 Subsequent Events - There are no subsequent events, as of the date of this report that would materially affect the results presented herein.

3.5 Explanation of Material Differences - Wakely has issued no other report regarding the development of these actuarial values. No comparison to prior results is necessary.

3.6 Oral Communications - No oral communication is considered part of this actuarial report. Any material assumptions or methods discussed in oral communications have been documented in written form as well.

3.7 Responsibility to Other Users - Intended users of this report have been specifically noted in the document.

ASOP 50: Determining Minimum Value and Actuarial Value under the Affordable Care Act

3.1 Use of AVC or MVC – The federal AVC was used.

3.2 Exceptions to the AVC – The federal AV was determined by making adjustments to the results of the federal AVC based on provisions that could not be appropriately modeled in the AVC.

3.3 Exceptions to the MVC – Not applicable.

3.4 Evaluating Non-Standard Plan Designs – The HDHP model was normalized to the federal AVC.

3.5 Reasonableness of Assumptions for Non-Standard Plan Designs – The assumptions used to modify the federal AVs were reviewed for reasonability.

3.6 Unreasonable Results – Not applicable.

3.7 Documentation – See ASOP 41 documentation above.

APPENDIX D

Standard Plan Designs –Deductible Plans

Deductible/OOP Max	2017 Plan Designs - Deductible Plans

APPENDIX E

Class I Pediatric Dental Codes

These procedures are diagnostic and preventive in nature. Under the definition of what is essential they may have limits. The services and limits are described in the Department of Vermont Health Access, Dental Procedure/Fee Schedule (Effective for services provided on or after 11/01/2013)

D0120 Periodic Oral Evaluation

D0140 Limited Oral Evaluation – Problem Focused

D0145 Oral Evaluation for a patient under three years of age and counseling with primary caregiver

D0150 Comprehensive Oral Evaluation

D0170 Re-evaluation – Limited, Problem Focused

D0210 Intraoral Radiographs– Complete Series (including bitewings)

D0220 Intraoral Radiographs – Periapical – First Film

D0230 Intraoral Radiographs– Periapical – Each Additional Film

D0240 Intraoral – Occlusal Film

D0250 Extraoral – First Film

D0260 Extraoral – Each Additional Film

D0270 Bitewing – Single Film

D0272 Bitewings – 2 Films

D0273 Bitewings – 3 Films

D0274 Bitewings – 4 Films

D0330 Panoramic Film

D0340 Cephalometric Film

D0350 Oral/Facial Photographic Images

D0364 Cone Beam CT Capture and Interpretation with Limited Field of View - Less Than One Whole Jaw

D0365 Cone Beam CT Capture and Interpretation with Limited Field of View of One Full Dental Arch - Mandible

D0366 Cone Beam CT Capture and Interpretation with Limited Field of View of One Full Dental Arch - Maxilla, with or without Cranium

D0367 Cone Beam CT Capture and Interpretation with Limited Field of View of Both Jaws, With or Without Cranium

D0368 Cone Beam CT Capture and Interpretation for TMJ Series Including Two or More Exposures

D0391 Interpretation of Diagnostic Image by a Practitioner Not Associated with Capture of the Image, Including the Report

D0470 Diagnostic Models

D1120 Prophylaxis – Child

D1208 Topical Application of Fluoride

D1330 Oral Hygiene Instructions

D1351 Sealant – Per Tooth

D1351 U9 Sealant – Per Tooth-Deciduous second molars and bicuspid*

D1352 Preventive resin restoration in a moderate to high caries risk patient -permanent tooth

D1510 Space Maintainer - Fixed – Unilateral

D1515 Space Maintainer – Fixed – Bilateral

D1525 Space Maintainer – Removable – Bilateral

D1550 Recementation of Space Maintainer

APPENDIX F

BLUE CROSS AND BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS METAL ACTUARIAL VALUES CERTIFICATION

Introduction

On January 21, 2016, CMS released the final methodology on the Actuarial Value and the final Actuarial Value Calculator (AVC) for 2017. CMS made few changes in the 2017 AVC. Most notably, they trended the underlying claims to calendar year.

Limitations of the Federal Actuarial Calculator

The AVC is known to have some limitations with respect to certain benefit designs. The most important limitations in the Final Actuarial Value Calculator for the Blue Rewards (Non-Standard) plans are:

- The AVC does not support the Rx OOPM Limit as dictated by Act 171.
- The AVC does not support Wellness (Safe Harbor) pharmacy drugs outside the deductible on HSA compliant plans.
- The AVC does not support certain MH/SA visits at no cost share before the deductible.
- The AVC does not support a copayment on Outpatient Surgery, Urgent Care, Emergency Medical Transportation, DME services nor Home Health Care.
- The AVC does not support Class I Pediatric Dental covered at no cost share.

Method Used to Calculate Adjustments

The objective of the adjustment process is to produce an estimate of the result the AVC would have produced with respect to the specific plan in question had it been able to measure all cost sharing elements for that plan. We created a model to calculate the ratio of expected benefits to allowed charges. See the description of the BCBSVT AV Model (BAVM) below. We used the BAVM to calculate both the complete benefit design and the benefit design for items supported by the AVC. We then applied the ratio of the two values to the AVC output for items supported by the AVC.

BCBSVT AV Model Methodology

BCBSVT uses a re-adjudication model to assess the impact of various deductible types, Rx limits, and out-of-pocket maximums to calculate the paid-to-allowed ratio for different benefit designs. The re-adjudication is performed using the same set of claims for all benefit plans. Claims data was taken from BCBSVT's data warehouse. The starting point of the analysis is allowed charges as determined by the BCBSVT claims adjudication system. The claims data includes benefit codes that enable us to identify the services and benefit structures (copays, deductibles, and coinsurance). The in-network claims from BCBSVT Insured Groups and Individuals expected to be in the Qualified Health Plans in 2017, representing 771,212 member months, are included in the analysis. Claims have been adjusted to reflect the network used for BCBSVT QHPs. Calendar year 2013 claims, trended to 2017 using 6.5% trend¹, were used in the model. The claims were categorized based on the cost sharing applied for each service, and one record was generated for each unique combination of member and service

¹ BCBSVT used the same trend that CMS used in the 2017 Final AV Calculator (see page 6 of <https://www.cms.gov/CCIIO/Resources/Regulations-and-Guidance/Downloads/Final-2017-AVC-Methodology-012016.pdf>)

METAL ACTUARIAL VALUES CERTIFICATION**

date. For all products, claims for preventive mandated benefits were kept separate. The model assumes these are paid in a manner consistent with the mandates.

The tables following the Actuarial Opinion show the relationship between the BAVM and the AVC.

A complete description of plan provisions is attached at the end of this document. The tables following the Actuarial Opinion contain information regarding the specific benefits that were calculated as adjustments to the AVC model.

Actuarial Opinion

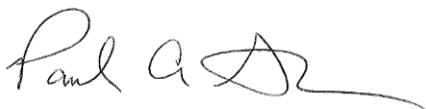

The purpose of this calculation is to comply with the requirements of 45 CFR 156.135(b)(3). The Actuarial Values were determined based on the plans' benefits and coverage data, the standard population, utilization and continuance tables published by HHS for purposes of valuation of Actuarial Value. These calculations are not intended to be used for other purposes.

I am a Fellow of the Society of Actuaries, a Member of the American Academy of Actuaries, meet the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and have the education and experience necessary to perform the work.

In my opinion, each of the plans described herein meets the AV requirements in the metal tiers for calendar year 2017.

The adjustments for plan design features unable to be determined directly through application of the AV calculator were developed in accordance with generally accepted actuarial principals and methodologies, Actuarial Standards of Practice established by the Actuarial Standards Board, and applicable laws and regulations, and are appropriate for the purpose intended.

Data used for the analysis were taken from the BCBSVT claims adjudication system, and normalized to the data underlying the AV calculator. This data was reviewed for reasonableness and consistency, but an audit was not performed.

Paul A. Schultz, F.S.A., M.A.A.A.
Chief Actuary
Blue Cross and Blue Shield of Vermont

METAL ACTUARIAL VALUES CERTIFICATION**

Blue Rewards Copayment Plans

Items not supported by the AV Calculator for these plans are

- Pharmacy MOOP of \$1,300
- Three Mental Health office visits at no cost share before the deductible
- Class I Pediatric Dental at no cost share
- Copayment on Outpatient Surgery, Urgent Care, Emergency Medical Transportation, DME services and Home Health Care

For Mental/Behavioral Health and Substance Abuse Disorder Outpatient Services, we blended the Office Visit copayment and the Outpatient Facility copayment based on the frequency of services from the continuance tables in the AVC to calculate the input needed in the AVC.

2017 AV Calculator

BLUE CROSS AND BLUE SHIELD OF VERMONT 2017 VERMONT QUALIFIED HEALTH PLANS METAL ACTUARIAL VALUES CERTIFICATION

Plan: Blue Rewards (Non-Standard) Copayment Plan - Silver CSR 94%

The inclusion of Mental Health office visits in the three PCP or Mental Health Office visits at no cost share before the deductible benefit and copays on Urgent Care, Emergency Medical Transportation, DME services and Home Health Care are not supported by the AVC for this plan. The difference between the AVC benefit of three PCP visits at no cost share before the deductible and the BCBSVT benefit of three PCP or MHSA visits at no cost share is immaterial² and the addition of copays on Urgent Care, Emergency Medical Transportation, DME services and Home Health Care is also immaterial; therefore we are using the AVC directly for this plan.

2017 AV Calculator											

² The AV calculator produces an AV of 94.13% for a plan with identical inputs other than MHSA cost sharing which is set to no cost sharing, therefore the waiving of cost sharing on up to three MHSA visits for those not having 3 or more PCP visits is not expected to have any material impact.

Purpose, Scope, and Reason for Rate Increase

Insurance Company Name	Bul Cross and Bul South of Vermont
HIOS ID	19827
SERFF Filing Number	998
Date of Submission	5/11/2016
Proposed Effective Date	1/1/2017
Average Annual Premium	
Before Rate Change	\$5,133
After Rate Change	\$9,819

Amount in SERFF's Rate Review Detail Section/Explanation for differences			
Proposed Overall Rate Change	8.17%	8.17%	N/A
Proposed Minimum Rate Change	5.25%	5.25%	N/A
Proposed Maximum Rate Change	10.92%	10.92%	N/A

If the difference between the maximum and minimum rate increase is greater than 10%, Provide a statement and clear delineation of contributing factors explaining why certain individual will receive a rate decrease as low as the minimum while others will face rate increases as high as the maximum

N/A

Relationship of Proposed Rate Scale to Current Rate Scale:

Provide a detailed breakdown of the average rate change from the previous approved filing by using the chart below to itemize the drivers of the average rate change. The table should include the previous assumption, current assumption, and the resulting change. Include additional lines as necessary.

Source of Change	Previous filing Assumption	Current Filing Assumption	Relativity Current Filing / Previous filing
Base Period Experience	486.72	502.37	1.080
Base Period Utilization Factor	0.99	0.99	0.991
Pricing Trend	1.14	1.11	0.970
Mortality Adjustment	0.97	1.00	1.041
Risk Adjustment Recoveries	0.99	1.00	1.005
Pent Up Demand	1.00	1.00	1.000
Reinsurance Recoveries	0.97	1.00	1.038
Reinsurance Premium	1.01	1.00	0.995
Average Age Impact	1.01	1.01	0.992
Additional EHB	1.01	1.00	0.994
Exchange Fee	1.00	1.00	1.000
Fixed Cost Adjustment	1.07	1.06	1.004
SC&A	1.00	1.00	1.000
Margin	1.01	1.02	1.013
Taxes and Fees	1.04	1.01	0.973
Benefit Design Changes	0.78	0.89	1.020
Geography	1.00	1.00	1.000
Tobacco	1.00	1.00	1.000
Provider Networks Changes	1.01	1.00	0.988
Non System Claims	1.01	1.00	0.985
Impact of Selection	1.02	1.01	0.990
Pharmacy Contract	1.00	0.99	0.991
Membership distribution by plan	1.00	1.01	1.015
xxxxx			1.000
Total Rate Change			1.082

e.g. previous filing experience period index rate compared to the current filing experience index rate
 If applicable, the change in this factor is based on the average copy impact difference between previous filing and current filing.
 The change in this factor is based on the change in the trend assumption in previous filing and current filing (e.g. 1.075^2 / 1.08^2)
 The change in this factor is based on the change in the mortality assumptions between previous filing and current filing.
 The change in this factor is based on the change in the risk adjustment recoveries assumptions between previous filing and current filing.

If applicable, Provide an explanation for difference between the Calculated Rate change and the average rate change in cell B17

The small difference between the calculated rate change and the average rate change is due to contract mix, order of operations and methodology.

Annual Rate Change Distribution

Risk Adjustment

Time Period	Actual Risk Adjustment Received	Assumed in Most Recent Approved Rate Filing	Assumed in Current Rate Filing	Proposed Change in PMPM Compared to Prior 12 months	Proposed Change in PMPM Compared to Most Recently Approved Filing
January 2014 - December 2014		January 2016 - December 2016	January 2017 - December 2017		
Total Risk adjustment (Dollar amount)	(\$2,671,246)	(\$3,105,500)	(\$1,298,149)	45.79%	10.75%
Membership Member Months	638,462	840,169	530,456		
PMPM	(\$4.18)	(\$3.70)	(\$1.38)	-87.41%	-63.13%
Premium	\$201,286,913	\$305,539,046	\$450,617,500	63.57%	15.12%
As a % of Premium	-1%	-1%	0%	-74.13%	-64.83%

If the actual risk adjustment payable/receivable was materially different than what was estimated in the previous filing, please provide details on how the current risk adjustment estimate has addressed the issue
 Please see section 3.7.1 of the actuarial memorandum

Please provide an exhibit, in excel with working formulas, demonstrating the calculation of the rate increase assuming that the current membership in terminated plans are mapped to renewal/proposed plans closest to the member's current benefit structure or Pricing AV. Include a quantitative calculation of the differences in benefits and cost sharing, as well as the Pricing and Metal AVs for the current and renewal/proposed 2016 plans. In the following text box state where in the filing the requested exhibit is located.

N/A - BCBSVT is not terminating any 2016 plans

Uniform Compliance

Please clearly demonstrate how the Company complies with the guaranteed renewability of coverage regulations (45 CFR 147.106) including the following:

Actuarial Memorandum Section 4.1	a) A list of all products that are terminated, renewed or are new in the current filing
Actuarial Memorandum Section 2.1	b) For products that were renewed, please demonstrate compliance with all provisions of the uniform modification of coverage.
Actuarial Memorandum Section 2.1	i. The product is offered as the same product type (for example, preferred provider organization (PPO) or health maintenance organization (HMO)).
Actuarial Memorandum Section 2.1	ii. The product covers a majority of the same counties in its service area.
Actuarial Memorandum Section 2.1 and Exhibit 1	iii. Each plan has the same cost-sharing structure, except for variation in cost sharing solely related to changes in cost and utilization of medical care, or to maintain the same level of coverage described in sections 1302(d) and (e) of the Affordable Care Act (for example, bronze, silver, gold, platinum or catastrophic); and
Actuarial Memorandum Section 2.1 and Exhibit 1A	iv. The product provides the same covered benefits, except for changes in benefits that cumulatively impact the rate for the product by no more than 2 percent (not including changes required by applicable Federal or State laws)
