ACTUARIAL MEMORANDUM

2019 Large Group MVPHP Manual Rate and Addendum Filing

Purpose of Filing

The purpose of this filing is to demonstrate the development of manual rates in support of MVP Health Plan's (MVPHP) Large Group HMO product portfolio and seek approval of the manual rates and factors used to develop group specific premium rates. The premium rates included in this filing are for group effective dates between 1/1/2019 and 12/31/2019. The rates are effective for 12 months. This rate filing has been prepared to satisfy the requirements of 8 V.S.A § 5104 and is not intended to be used for other purposes.

Note that MVP has migrated its entire product portfolio sold on the MVP Health Insurance Company (MVPHIC) license to MVPHP effective 7/1/2018. Where applicable, both the old MVPHIC product name and the new MVPHP product name have been displayed in the rate filing, and increases are comparing the new MVPHP product to the previous MVPHIC product.

Scope of Filing

As of May 2018, there are 2,171 members enrolled in Large Group plans on MVPHIC. Of these members, 1,853 have a 1st quarter renewal, 167 have a 2nd quarter renewal, and 151 have a 3rd quarter renewal.

The overall projected annual revenue change for 1Q 2019 is +13.7% and is driven by three factors which are described below.

- Manual Rate Change: MVP is proposing a quarterly manual rate increase of 10.6% which translates to an annual increase of 22.9%.
- Age/Gender Table Normalization: The average age/gender factor of the population in this experience period compared to the prior filing is 1.006. When combined with the normalization from the prior filing, the annual change to the age/gender factor results in a revenue decrease of -1.6%. MVP is dividing all of the current age/gender factors by this amount (1.006) which is actuarially equivalent to normalizing the claim projection by the same factor. The normalized age/gender table is included in Appendix B of the file, "Appendices A-C – 1Q 2019.xlsx".
- Change in Target Loss Ratio: MVP is increasing its target loss ratio from 81.2% in the 1Q 2018 filing to 86.4% for this rate filing which is decreasing the overall revenue change by 6.0%. The drivers of this reduction are renewing the groups onto MVPHP from MVPHIC, which removes the VT premium tax assessment and reduces the ACA tax liability, as well as the postponement of the ACA tax for 2019 coverage dates.

Please see the following table for a derivation of the overall revenue change for 1Q to 4Q 2019.

Derivation of Annual Revenue Change Based on Quarterly Rate Changes				
	1Q '19	2Q '19	3Q '19	4Q '19
	Annual	Annual	Annual	Annual
	Increase	Increase	Increase	Increase
Manual Rate Changes	22.9%	23.0%	15.3%	15.8%
Age Gender Table Normalization	-1.6%	-1.6%	-1.6%	-1.6%
Impact of Changes in Target Loss Ratio	-6.0%	-5.6%	0.1%	1.0%
Proposed Annual Revenue Change	13.7%	14.4%	13.7%	15.0%

Experience Period Claims

Large group MVPHIC claims incurred between May 2017 and April 2018, paid through May 2018 (with incurred estimates updated through June 2018) were the basis of MVP's rate analysis. Fee-for-service (FFS) medical and pharmacy claims were projected to the 1Q 2019 rating period by applying 20 months of trend to the experience period data. The capitation and non-FFS costs included in the rate development represent MVP's best estimate of these costs during the rating period.

Pooling Charge

To account for volatility in high cost claims, claims in excess of \$100,000 are being removed from the claim projection and replaced by a pooling charge. Because MVP has limited large group data in Vermont, the pooling charges in this filing have been updated to align with MVP's large group business in New York. The pooling charge of 9.92% is equal to the \$100,000 pooling charge included in MVP's LG Addendum which is included with this SERFF submission. For a summary of the high cost claim ratio in recent time periods, please refer to the attached file, "Rolling 12 Medical and Rx Data – LG".

IBNR Factor

As previously stated, MVP is reflecting an incurred estimate with two months of claim run-out. We have completed the claims using an IBNR factor of 4.8% which is our best estimate of ultimate liabilities as of 6/30/18. MVP uses a combined trended PMPM and completion factor method to value its ultimate claim liabilities. Please see the following table comparing incurred and paid claim amounts by month for the experience period. Note that this IBNR model is not exclusive to this block of business, so the paid and incurred claim amounts will not tie out to the experience in the filing.

Incurred Month	Paid Claims	Incurred Claims	IBNR Factor
201804	\$952,428	\$1,318,157	1.384
201803	\$1,484,586	\$1,749,705	1.179
201802	\$1,161,602	\$1,247,091	1.074
201801	\$1,184,180	\$1,211,633	1.023
201712	\$1,351,218	\$1,365,081	1.010
201711	\$1,650,401	\$1,651,195	1.000
201710	\$1,614,175	\$1,622,180	1.005
201709	\$1,517,801	\$1,525,677	1.005
201708	\$1,493,124	\$1,499,506	1.004
201707	\$1,072,480	\$1,075,125	1.002
201706	\$1,317,386	\$1,318,240	1.001
201705	\$1,437,776	\$1,438,296	1.000
Total	\$16,237,156	\$17,021,886	1.048

Development of Manual Rate Increase

Exhibit 3a demonstrates the development of the proposed 1st quarter rate action. FFS medical claims completed with IBNR and adjusted for the pooling charge are projected to the rating period. An adjustment to the claim projection is made to account for New York's HCRA Surcharge. The New York HCRA Surcharge included in the claim projection is based only on claims paid for services performed by New York hospitals. The load for this surcharge equals 0.25% and is based on historical HCRA fees incurred by Vermont members.

Experience period Rx claims are adjusted for pooling and projected to the rating period. MVP has received 2019 forecasted Rx rebate information from its PBM which is reflected in the projected Rx rebate calculation. Separate rebate per script information has been provided for brand and specialty drugs. These amounts were applied to MVP's projection period brand and specialty script utilization to obtain a PMPM estimate of the rebates in the projection period and equals \$22.15 PMPM for 1Q 2019 renewals and increasing with pharmacy utilization trend for 2Q-4Q 2019.

Consistent with the prior filing, MVP is reflecting the new regulation regarding the use of statins for the prevention of cardiovascular disease (CVD) in adults which will go into effect in November 2017. The United States Preventive Service Task Force has given low- and moderate-dose statins a grade of "B" when prescribed to adults aged 40 to 75 with no prior history of CVD but evidence of risk factors. This means that it will become mandatory that carriers cover these drugs in full with no member cost sharing. Because these drugs were previously covered by MVP but with the applicable member cost sharing applied, an adjustment needs to be made to the experience period data to reflect the removal of cost sharing. MVP has estimated the cost sharing during the experience period based on member's age and a lack of a CVD diagnosis, and the result was a \$0.20 PMPM increase to the experience period pharmacy incurred claims. This has been reflected in line 8c of Exhibit 3a in the rate filing.

Non-FFS claim expenses and capitation expenses are added to the claim projection. Please see the following table for a summary of non-FFS and capitation expenses reflected in MVP's rate development for this filing.

Summary of Capitations and Non-FRDM Claim Expenses	
---	--

Other Medical Expense not in warehouse	\$2.51
Chiropractic and Acupuncture Cap	\$0.71
Net Reinsurance Expense	\$0.24
Medical Home and PCP Incentive	\$2.36
Total	\$5.82

The expected non-FFS medical expenses added to the claim projection reflect costs associated with net reinsurance expense, PCP incentive payments and Medical Home, and other miscellaneous MVP claim expenses not included in the historical experience period data such as manual checks and Massachusetts surcharges. The Other Medical Expense data is comprised of a 3-year average of data for all Vermont group sizes and companies (MVPHP and MVPHIC) in order to minimize random variation in this block of business.

Please note that the line item for the 18 V.S.A § 9374(h) Billback included in claim expense in previous filings has been moved to a non-claim expense, per the Green Mountain Care Board's direction.

Finally, adjustments are made to the projected net claims cost to account for average industry factor and the impact of membership changes over the experience period.

The industry normalization factor shown on Exhibit 3a was computed using MVP's census over the experience period along with the industry factors included in Appendix A of the file, "Appendices A-C – 1Q 2019.xlsx" which is included with this SERFF submission. MVP is not proposing changes to these factors for 2019. Because MVP is deriving its proposed rate increase from the 2Q 2018 manual rates which reflects an industry factor equal to 1.00, claim costs must be adjusted to be on a 1.00 basis as well. Over the experience period, the average industry factor was 1.025. To neutralize the impact of this factor on the required rate change, MVP is multiplying the 1Q 2019 claim projection times the reciprocal of this factor.

MVP is also making an adjustment to the claim projection for the impact of membership not representing a full 12-month contract over the experience period. Because deductibles are present in most these products, paid claims are suppressed in the early months of a member's contract and are higher than average in later contract months. Therefore, if the experience period membership is not evenly distributed by contract month, an adjustment to the claim costs should be made to reflect the expected claim costs for a 12-month contract period.

To determine the adjustment factor for the experience period claims cost, MVP used deductible suppression factors which were developed by analyzing commercial claims for members with 12 months of medical and Rx benefit coverage. MVP assumed that allowed claims were uniformly distributed by month and determined the expected paid claim cost for a given month relative to the average paid amount for 12 months. Factors were developed for a number of different deductible levels, and MVP split its experience period membership by these deductible levels to compute the appropriate adjustment factors. This adjustment factor equals 1.006 and can be found in Exhibit 3a. A quantitative derivation of this factor can be found in the file, "Impact of Membership Growth_Decline on Experience Pd Claims". To arrive at the data suggested quarterly rate change for 1Q 2019, the normalized net claim projection is compared to the 4Q 2018 manual rate that would be collected for the experience period enrollment to indicate the suggested quarterly manual rate change.

MVP has also developed 2Q 2019 to 4Q 2019 manual rates for this rate filing. Please see Exhibits 3b to 3d which are identical to Exhibit 3a except for the fact that one additional quarter of 2020 trend has been applied to the experience period claims. Comparing the 2Q 2019 projected claims to the 1Q 2019 claim projection determines the quarterly manual rate change, and similarly for 3Q 2019 and 4Q 2019.

Medical Trend Factors

The development of annual medical paid claim trend factors for 1Q 2019 is illustrated in Exhibit 2a. MVP is reflecting 0.0% medical utilization trends in the current filing, and the assumed unit cost trends reflect known and assumed price increases from MVP's provider network as of the filing date.

As stated previously, MVP has assumed 0.0% for medical utilization trends in the current filing. MVP analyzed its combined MVPHIC and MVPHP Vermont data for 36 months between 2016 and 2018. In performing this analysis, we were concerned with the large impact that membership growth in other blocks of business (MVPHP small group and individual exchange) was having on the total utilization trend for Vermont. Because removing MVPHP data from the calculation would leave a block that was not considered credible, we elected to reflect no utilization trend.

The assumed unit cost trends reflect known and assumed price increases from MVP's provider network. The 2018 unit cost trends for VT hospitals reflect the budgets proposed by each hospital back to the Green Mountain Care Board. Please see Exhibit 2A for the unit cost trends by claim category by year. The 2019 unit cost trends for VT hospitals reflect the proposed commercial rate requests from the hospitals to the GMCB. MVP's unit cost trends for non-VT providers for both years reflect the best estimate of MVP's contract negotiations. MVP has assumed that the 2020 annual trend is equal to the 2019 trend, as we lack information on unit cost trends for 2020 at this time.

In addition to the medical cost inflation rate assumed from the historical experience period to the rating period, an adjustment is needed to reflect the impact of cost share leveraging on the carrier's share of the medical cost. Leveraging is a result of the fixed nature of deductibles and copays in health benefit plans. When there are fixed member deductibles and copays, the carrier bears a greater portion of the cost of medical inflation. Therefore, an additional factor adjustment is made to the trend assumption to capture this cost.

The trend applied to the deductible portion of the experience period was derived using the distribution of claims for MVP's VT book of business. Claims below the average deductible amount over the experience period were trended at the applicable allowed trend rate while claims greater than the deductible were held flat.

Also included in this filing are paid trend development exhibits for 2Q 2019 to 4Q 2019. Please see Exhibits 2e, 2i, and 2m which are identical to Exhibit 2a except there is one more quarter of trend reflected in each calculation.

Rx Trend Factors

Annual Rx trend factors split by generic, brand and specialty drugs are illustrated in Exhibit 2a. These trend factors were supplied by MVP's pharmacy benefit manager (PBM) and reflect their best estimate of expected changes to pharmacy costs and drug utilization, given MVP's data as a starting point. Supporting documentation illustrating how the Rx trends shown on Exhibit 2a were converted to paid trends for 1Q 2019 can be found in Exhibit 2b.

MVP has revised its trend forecasts from the previous version of this filing to reflect changes in the underlying utilization patterns as well as updated unit cost increases provided by MVP's PBM. The PBM has provided trends for 2018 and 2019. The trends for 2020 are assumed to be equal to the 2019 trends. The trend forecast provided by MVP's PBM accounts for drugs coming off patent, changes in average wholesale price, new drugs being released to the market, and price competitiveness amongst generic and brand drug manufacturers. Please see the following table which displays MVP's pharmacy trends in this filing.

Rx Trends Used in 2019 MVP VT Large Group Filing

	2018 Trend		2019 Trend		2020 Trend	
	Unit Cost	Utilization	Unit Cost	Unit Cost	Unit Cost	Utilization
Generic	-0.7%	2.4%	4.9%	3.2%	4.9%	3.2%
Brand	14.3%	4.5%	12.1%	-0.4%	12.1%	-0.4%
Specialty	4.2%	7.6%	9.6%	7.8%	9.6%	7.8%

Please see the attached file, "Rolling 12 Medical and Rx Data - LG.xlsx" which contains a rolling 12 month summary of total Rx claim costs as well as Rx data broken out by Generic, Brand, and Specialty.

Also included in this filing are paid trend development exhibits for 2Q 2019 to 4Q 2019. Please see Exhibits 2f, 2j and 2n which are identical to Exhibit 2b except there is one more quarter of trend reflected in each calculation.

Retention Expenses

Retention expenses are outlined in the attached Addendum. The following table represents MVP's Large Group administrative expenses as filed in the Supplemental Health Care Exhibit over the past four years:

Administrative Expense Summary - Data Taken from Supplemental Health Care Exhibit

	VT Large Group – MVPHIC & MVPHP			Admin Expense Ratio
	Member Months	Premium PMPM	Admin PMPM	
2014	97,084	\$404.11	\$38.31	9.5%
2015	68,766	\$432.06	\$34.13	7.9%
2016	37,858	\$450.19	\$36.77	8.2%
2017	25,372	\$474.10	\$42.09	8.9%

Admin PMPM reflects the following lines from Part I of the SHCE: 6.6, 8.3, 10.1, and 10.4

Changes have been made to the following retention items since the 3Q 2018 filing:

- Administrative Load: MVP is proposing to reduce the administrative expense load in the current filing from 9.5% of premium to 8.9% of premium. This will match the administrative expense ratio as filed in our 2017 Supplemental Health Care Exhibit.
- Covered Lives Assessment: The 2019 covered lives assessment has yet to be finalized by New York State. MVP is assuming a 5% increase in the 2018 covered lives assessment, consistent with prior filings.

The following taxes/assessments are included in the attached Addendum:

ACA Insurer Tax

Since 2014, carriers have been taxed based on earned premium. After being delayed for 2019, MVP is assuming that the tax will be reinstated for plan years 2020 and beyond. The tax is based on MVP's share of nationwide revenue relative to the total tax liability collected by the Federal Government. Using this information, MVP estimates the tax will be 0.0% of premium for 2019 coverage months and 1.0% for 2020 coverage months. The tax will be applied based on a groups contract effective start date and the anticipated number of coverage months that will occur in 2020.

VT Paid Claim Tax

The State of Vermont charges a 0.999% tax on paid claims.

18 V.S.A § 9374 (h)(1) Billback

As stated previously in the memorandum, MVP has moved fees incurred under this billback program from claim expenses to PMPM taxes/assessments. This filing assumes a tax of \$0.91 PMPM. The Green Mountain Care Board performed a study which estimated MVP's liability for 2019 at \$317,000. This was then divided by MVP's membership as of May 2018.

VT Vaccine Pilot

This is a Vermont state assessment based on plan premiums which is used to fund immunizations provided by the state. Based on discussions with the administrator of the program, funding for the program will be suspended for 2019. MVP is assuming 0.0% of premium in the current filing.

Loss Ratio Information

The traditional target loss ratio (claims cost / premium) for the rates proposed in this rate filing is 86.4%. After making adjustments for taxes/assessments and expenses associated with quality improvements, the Federal target loss ratio for the rates proposed in this filing is 87.4%. Please see the following table for more detail:

Target Loss Ratio for LG VT in 1Q 2019	
	Large Group VT
A) Claims Expense	\$436.97
B) Taxes/Assessments	\$0.91
C) Quality Improvement	\$4.50
D) Premium	\$505.92
E) Traditional Loss Ratio = A) / D)	86.4%
F) Federal Loss Ratio = [A) + C)] / [D) - B)]	87.4%

For calendar year 2017, the actual loss ratio for this block of business is 96.2%. MVP did not rebate customers for its Large Group AR42 VT block in 2015 or 2016, and does not anticipate having to pay an MLR rebate for the block for the 3 year average of 2015-2017.

Supplemental Exhibits

Also included with this filing is a historical claim and membership summary for the past 36 months grouped into rolling 12 month periods. Incurred claims from May 2015 – April 2018 completed through June 2018 are reflected in the data. Note the data represented in these files excludes the 51-100 eligible subscriber block that previously transitioned into the small group market.

Changes to Rating Formula

MVP is adding an additional section to its experience rating formula to rate collective arrangements in Vermont. These arrangements are comprised of large groups from similar industries that will be experience rated together. All groups entering the arrangement must have at least 100 employees and meet Vermont's large group size definitions. Please see Section VII of the Experience Rating Formula for more information on how the collective rate and each subgroup's rate will be calculated.

New Products

MVP is offering a new wellness rider effective 1/1/2019: MV3H[MB/DH]366L. This rider will be baked into the base benefit of every group purchasing coverage with MVP. Because claims for the current wellness rider (MV3H[MB/DH]336L) are already included in the experience period claim data and MVP has determined the two benefits to be actuarially equivalent, no change to the experience period claim data is necessary.

Actuarial Certification

I, Eric Bachner, am an Associate of the Society of Actuaries. I have examined the assumptions and methods used in determining MVP's requested rates. Based on my review and examination, it is my opinion that the proposed premium rates are reasonable in relation to the benefits provided and that they are not excessive, inadequate, nor unfairly discriminatory. This rate filing conforms to the applicable Standards of Practice as promulgated by the Actuarial Standards Board.

Eric Bachner, ASA
Leader, Actuarial, Commercial/Government Programs
MVP Health Care

MVP Health Care, Inc.
AR44 Experience Rating Formula
HMO Products
For Large Employer Groups
(100+ Employees as defined by regulation)
Effective 01/01/19

INTRODUCTION

MVP Health Plan, Inc. (“MVP”) markets Experience Rated HMO products to large employer groups as defined per Vermont regulation. Prospective experience rating and Retrospective experience rating methods are offered. In addition, a Minimum Premium Funding arrangement is available via a rider.

MVP’s large group rating formula has three parts. Part 1 develops a group specific manual pure premium. Part 2 develops a pure premium based on the group’s actual claims experience. Part 3 blends the two using credibility factors and then develops the group’s premium rates. The attached Exhibits A through C illustrate the calculation from start to finish and this document provides a description of each component. The actual factors used in the calculation are contained in a separate Experience Rating Addendum filing.

The addendum filing and the factors contained within will be reviewed and adjusted annually or as necessary. Whenever possible, the rating factors will be developed using MVP historical experience and will be normalized to MVP’s population.

II: MANUAL PURE PREMIUM (part 1)

Part 1 of the formula is the calculation of the group specific Manual Pure Premium (the Adjusted Manual Pure Premium).

- 1. *Manual Pure Premium*** – The Manual Pure Premium rate table can be found in the Experience Rating Addendum. These rates reflect the expected claim cost for the book of business for each benefit offering for the rating period.
- 2. *Industry Factor*** – A factor to adjust for the group’s specific industry. The industry factor table can be found in the Experience Rating Addendum.
- 3. *Demographic Factor*** – A factor to adjust for the group’s specific demographic makeup. The demographic tables can be found in the Experience Rating Addendum.
- 4. *Manual Group Risk Assessment Factor*** - Rating factors to reflect specific characteristics of the group. See the Experience Rating Addendum for more information.
- 5. *HRA/HSA Funding Load Factor*** – The additional risk charge applies when a group funds a plan deductible. The charge is intended to account for the anticipated increase in utilization of services due to the resulting ‘first dollar’ coverage provided. See the Experience Rating Addendum for the applicable factors.

6. **Adjusted Manual Pure Premium** - The product of 1 through 5 above. This is the starting basis for the non-credible portion of the group's premium calculation.

III:EXPERIENCE PURE PREMIUM (part 2)

For existing MVP groups, historical paid claim experience will be used. The underwriter will typically use the most recent 12 months of data with 2 months run-off. There may be instances where more or less data is available. It will be reviewed to determine appropriateness and credibility.

For groups new to MVP, historical paid claim information will be used if it is determined to be credible and appropriate. The data will be adjusted whenever possible to reflect differences in products and benefits being quoted and for differences in provider contracting and medical management. Any adjustments to the data will be documented in the group's rating file. If MVP is not satisfied with the historical paid claim data received, the Adjusted Manual Pure Premium will be used for the first policy year.

PRIMARY INPUTS

- Experience Period Start Date – The first date of the experience data, based on date of service.
- Experience Period End Date – The last date of the experience data, based on the date of service.
- Paid Through Date – The date the claims in the experience period are paid through. This is used to determine the appropriate IBNR completion factor to adjust claims.
- Midpoint of the Experience Period – Middle date of the period start date and the period end date

Product Reflected in the experience – The product previously offered and reflected in the experience. For MVP renewal groups, the benefits are known in detail. For new groups, MVP may have limited benefit detail. When applicable, adjustments to claim information will be determined based on this information.

Product in the rate quote – The product and benefits being quoted. All products quoted will have rates on file with the State of Vermont.

Member Months – The member months for the experience period.

Out-of-Area Subscribers – The number of subscribers who are living outside of the MVP service areas.

CLAIM INFORMATION

1. ***Date of Service Paid Claims*** – The total claims paid for claims incurred in the experience period prior to adjusting for large claims and incurred but not reported claims.
2. ***Composite Completion Factor Adjustment*** – The factor used to complete paid claims. The completion factor depends on the length of the experience period and the number of months paid after the end of the experience period (or “claims runoff”). Factors are often applied during the data reporting and may also be included in #1 in an actual group calculation.
3. ***Incurred Claims*** - The projected total incurred claim cost for the group, adjusted for unpaid claims.
4. ***Other non Fee for Service medical expenses*** – The medical expenses associated with items like Capitation arrangements, Wellness Reward programs and Provider Incentive programs.
5. ***Pooling Level*** – The pooling level (attachment point) for the group. (See Experience Rating Addendum for details). Medical and Pharmacy claims will be included in the pooling calculation.
6. ***Actual Large Claims (excess over pooling level)*** – The claim amount in excess of the attachment point for all applicable claims in the experience period.
7. ***Pharmacy Rebate Factor*** – A factor to reflect pharmacy rebates received from MVP’s Pharmacy Benefit Manager. This represents an average percentage adjustment for MVP’s Rx community pool and is only applied to Rx costs. See Experience Rating Addendum for details.
8. ***Incurred Claims less Large Claims*** – The total Incurred Claims less the Large Claims.
9. ***Trend factor to midpoint of Projection Period*** – The trend rate based on the start and end date of the experience period and the renewal rating period. See the Experience Rating Addendum for trend factors.
10. ***Trended Net Claims*** – The Incurred Claims less Large Claims multiplied by the trend factor.
11. ***Trended PMPM Net Claims*** – The Trended Net Claims divided by the member month exposure for the experience period.

EXPERIENCE ADJUSTMENTS

- 12. Demographic Factor (Carrier Replacement Only)** – In the event MVP is requested to provide an experience rate for the entire group, a demographic adjustment may be warranted. If MVP is offered on a slice basis and the quote is for full carrier replacement, MVP may adjust their own experience to reflect the demographics of the entire group. If claims experience is obtained for the rest of the group then that will be used instead. See the Experience Rating Addendum for the demographic factors.
- 13. Prior Period Adjustment Factor** – In most cases, the underwriter will be looking at the most recent 12 months of a group's experience with 2 months of runoff. However, there may be instances where the underwriter will look at another claim period for the group and combine it with the most recent experience period. An example of this may be if a group had an unusually high number of large claims in the current period, the underwriter could look at the prior period to evaluate the large claim history. In the event the prior period history is very different, the underwriter could dampen the impact of the extraordinary large claims by blending the two periods together.

The calculation of this adjustment factor is shown in the attached Exhibit B. The calculation of the Adjusted PMPM Net Claim amount is done in the same manner as in Exhibit A for the current experience period (Period 1) and is repeated for the prior experience period as well (Period 2). A weighted average of the two is then computed based on Period Weights assumed by the underwriter. The average PMPM is divided by the Period 1 PMPM to derive the Period Period Adjustment Factor.

The Period weight is the amount of weight given to each period. See the Experience Rating Addendum for details.

- 14. Network Adjustment Factor** – An adjustment to reflect differences in network providers, contractual provider reimbursement rates, gatekeeper vs. no gatekeeper, and referral vs. open access between the experience period data and the product being quoted. The calculation of any adjustment to the paid claims will be documented in the group file. See Experience Rating Addendum for details.
- 15. Benefit Adjustment** – An adjustment to reflect material differences between the benefits inherent in the groups historical paid claim experience and the benefits being proposed in the quote. The factor will be calculated and applied separately to the Medical vs. the Prescription Drug claims. The calculation of any adjustment to the paid claims will be documented in the group file. See Experience Rating Addendum for details.

16. ***Pooling Charge %*** - The load applicable to the pooling level selected. See Experience Rating Addendum for details.
17. ***Adjusted PMPM Net Claims*** – The net incurred claims after applying the experience adjustments.
18. ***Covered Lives Assessment (CLA)*** – The amount paid for the Covered Lives Assessment. See the Experience Rating Addendum for detail.
19. ***Indigent Care*** – The amount paid to the State Public Goods Pool. This does not apply to Rx claims. See Experience Rating Addendum for detail.
20. ***Experience Pure Premium*** – Equal to the Adjusted PMPM Net Claims multiplied by the Prior Period Adjustment Factor, if applicable plus the PMPM CLA and Indigent Care expenses.

IV: EMPLOYER SPECIFIC PREMIUM RATES (part 3)

The results of Sections II and III above are blended together using credibility factors to determine the blended pure premium. Final adjustments, explained below, are then applied to arrive at the premium for the group. The premiums for the group's specific tier structure being quoted are then derived from this.

BLENDING OF EXPERIENCE PURE PREMIUM AND ADJUSTED MANUAL PURE PREMIUM

1. ***Adjusted Manual Pure Premium*** –Section II, line 6
2. ***Experience Pure Premium*** –Section III, line 20
3. ***Experience Credibility Weight*** – The weight assigned to the Experience Pure Premium based on the member months from the experience period. See the Experience Rate Addendum for the applicable credibility table.
4. ***Blended Pure Premium*** – The weighted average of the Adjusted Manual Pure Premium and the Experience Pure Premium based on the credibility assigned to the group.
5. ***Group Risk Assessment Factor*** – Rating factors to reflect specific characteristics of the group. See the Experience Rating Addendum.
6. ***New Business Discount Factor*** – See the Experience Rate Addendum for details.
7. ***Retrospective Financial Underwriting Factor*** – The additional risk charge applied when the group is using retrospective experience rating. See the Experience Rating Addendum for the applicable factors.

8. **Network Access Fee** – In the event the group has members who live outside of MVP’s service area, MVP’s rental network assesses an out-of-network access fee. The access fee is charged per OOA subscriber and then translated into a PMPM fee based on the group’s total membership. See the Experience Rating Addendum for the network access fee.
9. **Retention Excluding Premium Tax** – The expense loads added to pure premium to cover general administrative fees, bad debt, risk charges, broker fees, net reinsurance, etc. See Experience Rating Addendum for details.
10. **Premium Tax** – The amount of premium tax. It is a percentage of premium and shown as a PMPM value. See Experience Rating Addendum for details.
11. **Group Required Pure Premium** – $(4 \times 5 \times 6 \times 7) + 8 + 9 + 10$

PREMIUM RATE DEVELOPMENT

12. Employer Specific Loading Factor – Converts the Group Specific Pure Premium to Single, Double, Parent/Child(ren), and Family premiums. A group can choose a two-tier, three-tier, or four-tier billing structure. A group specific Step-Up Factor is calculated using the group census and the group’s desired load ratios.

If MVP doesn’t have credible census information for the group the premium conversion factors from an MVP community rate filing will be used.

13. **Final Premium Rates** – 11 x 12. When more than one plan is offered to an employer, the rates for each plan are developed in a consistent manner as described here. In the case where the employer’s own claim’s experience is being used to develop the premium rates, the actual claims are allocated back to the individual products based on the expected cost of each benefit plan.

Renewal Rate Cap Guarantee – A maximum renewal increase (cap) may be offered to select employer groups at point of sale for a new group or upon renewal for an existing group. If a cap is offered, the group’s next renewal premium derived via this formula will be constrained by the maximum agreed upon renewal increase. A cap will be considered only for groups with a minimum of 100 enrolled subscribers and where MVP is the only carrier offering health insurance to the group. The group must have 2 years of claim history available for review in the rate setting, regardless of whether it is a new or existing case and there are no ongoing large claimants. Groups that meet these selection criteria will be considered on a case by case basis for the cap offer. Not every group that meets these criteria will be offered a renewal increase cap. The maximum renewal increase offered will be at least equal to the projected trend rate used in the rate setting plus some margin. The amount of the margin will depend on the risk characteristics of the group.

V: RETROSPECTIVE EXPERIENCE RATE ACCOUNTING

MVP offers two options for Retrospective Accounting:

- 1) Underwriting gains and losses are shared with the group
- 2) Only underwriting gains are shared with the group

All retrospectively rated groups will pay a risk charge above the standard retention expenses associated with prospectively rated groups. This risk charge is outlined in the Experience Rating Addendum filed under separate cover and updated annually.

The Underwriting gain or loss for each retrospectively rated large group is determined annually using the prior policy years' incurred claim expense and 3 months of paid claim run out plus an additional amount for assumed IBNR claims.

To determine if the group is in a gain or loss position the actual premium collected over the policy year is compared to the actual incurred claims (including an estimate for IBNR) plus the PMPM fee for service medical claim expenses and non claim expenses from the group's premium rate development for that policy year. The actual incurred claims used will be net of any individual member claims over the pooling point purchased by the group for that policy year.

The group is in a gain position if the actual premium collected is greater than the sum of the estimated total incurred claims, the non fee for service medical expenses and the non claim expenses. If not, the group is in a loss position. Underwriting gains, or a portion of, are returned to the group. Underwriting losses, depending on the group contract, will either be the groups or MVP's responsibility.

VII: MINIMUM PREMIUM FUNDING ARRANGEMENT

An employer group can use Minimum Premium Funding by attaching a Minimum Premium Funding Arrangement (MPFA) rider to the group contract. MVP will utilize the large group formula to establish the Claims Liability Rate and other items in the MPFA rider. Exhibit A, attached, Section V. shows the calculations necessary to complete the MPFA rider.

1. ***Final Premium Rates*** – The final rates as determined using the MVP Large Group formula.
2. ***Retention Rate*** – The amount of retention included in the Final Premium Rates. The group is billed separately for retention charges.
3. ***Claims Liability Rate (CLR)*** – Line 1 minus Line 2, or the premium rates without retention.

4. ***Claims Fluctuation Margin*** - Addendum value. Also sometimes referred to as the Minimum Premium “Risk Corridor”, the amount of risk over the claims projection to be absorbed by the employer group. The amount of risk assumption will vary by group size and risk characteristics of the group.
5. ***Maximum Monthly Premium Liability (MPL)*** – Line 3 x Line 4 x the number of subscribers in each premium tier for the month. The MPL will be used to determine any monthly gain or loss by comparing against actual claims in the month. Over the contract period, the cumulative gain or loss is determined by comparing the cumulative MPT to the cumulative actual claims paid. Settlements of gains and losses will be described in the MPFA rider language.

VIII: COLLECTIVE ARRANGEMENTS

MVP will allow groups from similar industries to form a collective arrangement which will be bound by the bylaws of the trust agreement in which they enter. All of the groups within the collective will have at least 100 employees and meet Vermont’s large group size definition if they were rated separately. Rates for the collective will be calculated as follows:

Step I) Each group within the collective will be rated separately using the experience rating formula outlined above assuming 100% credibility with a low pooling level and no pooling charges will be applied.

Step II) The total collective group rate will be determined using MVP’s experience rating formula outlined above. The pooling level used in this step will be greater than the pooling level(s) used in step I. MVP’s filed pooling charges and credibility will be applied.

Step III) The difference between the calculated premium in step I and step II will be determined on a PMPM basis and added back to the individual group rates determined in step I.

Please see Exhibit C of the attached formula for an illustrative example of this calculation.

IX: EARLY QUOTING CLAUSE

Large Employers often require firm rate proposals 7-9 months in advance of the renewal effective date due to the effort required to coordinate renewals from multiple carriers and prepare open enrollment materials for their employees. It is usually the case that MVP does not yet have the next calendar year addendum values finalized and ready to quote and file this far in advance.

Upon request, for accounts with at least 2,000 total employees, MVP will develop the group's premium rates based on the current formula and addendum values. Once MVP finalizes the next calendar year addendum factors and formula, all rates calculated thereafter will be based on the updated formula and addendum.

CERTIFICATION

I believe the rating formula described herein is consistent with industry norms, follows sound actuarial and underwriting principals and the rating factors used and documented in the Experience Rating Addendum are reasonable relative to MVP's book of business and industry norms.

I have reviewed the provisions of Vermont Insurance Law. It is my opinion that this rating formula complies with the requirements of those provisions.

Eric Bachner, ASA
Leader, Actuarial, Commercial/Government Programs

MVP Health Plan (“MVPHP”) Experience Rated Addendum –2019 Effective Dates

This document is an Addendum to MVP’s 2019 Manual Rate Filing and Experience Rating Formula for products sold to employer groups with 100 or more employees in the State of Vermont under MVP’s Health Plan license. This addendum and its appendices outline the rating factors discussed in the Experience Rating Formula. These factors are being filed as an addendum to the Manual Rate and Formula filings so they can be updated as deemed necessary by MVP without having to re-file the rating methodology.

Whenever possible, the rating factors contained herein will be based on actual MVP experience or they will be normalized to MVP’s population.

BASE MANUAL RATES

Please see Exhibits 4a (base manual rates), 4b (medical riders), and 4c (Rx riders) of the accompanying manual rate filing for the net PMPMs of plans and riders being offered by MVP for 2019 effective dates. Please See Exhibit 1 in the MVPHIC rate filing for the POS out of network riders filed on MVP Health Insurance Company for 2019 effective dates.

SIC FACTORS

The industry factors in Appendix A will be applied to the manual rates based on the employer’s industry.

DEMOGRAPHIC FACTORS

To more closely resemble the health risk of the employer’s insured population, the manual pure premium will be adjusted to reflect differences in the demographic characteristics of a specific employer group compared to MVP’s community pool for the chosen product. This demographic factor will be applied to both the base rate and riders.

With respect to the employer specific experience rate, there may be a situation where MVP will be the sole health plan offering and be required to adjust the experience to reflect anticipated health characteristics of the entire group versus just MVP’s members who were enrolled in the previous year under a slice product offering. In this situation, MVP will develop a demographic factor relative of the entire group and compare that to the demographics of their existing employer membership.

The demographic factors are in Appendix B. A per member demographic factor is calculated as the weighted average subscriber age/sex factor / weighted average subscriber average contract size.

For members that are considered to have Medicare as their primary coverage, a downward adjustment factor will be applied to the member’s demographic factor to reflect the reduced claim liability. This factor is in Appendix B.

HRA/HSA DEDUCTIBLE FUNDING FACTORS

The additional risk charge applies when a group funds a plan deductible. The charge is intended to account for the anticipated increase in utilization of services due to the resulting ‘first dollar’ coverage provided. The manual rate adjustment factors are in Appendix C.

POOLING CHARGES

Each group is charged a pooling fee and fee-for-service medical and Rx claims above the applicable attachment point are removed from their claim data. The charge is based on the following table:

Pooling Level	2019 Pooling Charge
\$80,000	12.35%
\$85,000	11.72%
\$90,000	11.10%
\$100,000	9.92%
\$125,000	7.47%
\$150,000	5.72%
\$175,000	4.56%
\$200,000	3.75%
\$250,000	2.59%
\$300,000	1.89%
\$350,000	1.37%
\$400,000	0.99%
\$450,000	0.77%
\$500,000	0.61%

Group size will be considered when selecting the appropriate pooling charge. The max pool level is the maximum amount MVP will allow for a given group size:

Avg. Subscribers	Max Pool Level
Up to 299	\$100,000
300-499	\$150,000
500-999	\$200,000
1,000-1,499	\$250,000
1,500-2,499	\$350,000
2,500 and up	\$450,000

TREND FACTORS

The following trends are used to project historical experience of the group to the proposed rating period. Exhibit 1 and Exhibit 2 are developed by applying the appropriate pro-rated calendar year trend factors from the midpoint of the experience period to the midpoint of the rating period. Paid trends are calculated by multiplying the applicable allowed trend times the leveraging factor.

Year	Allowed Medical Trend	Pharmacy Trend
2018	3.5%	11.5%
2019	4.2%	14.4%
2020 & Beyond	4.2%	14.5%

Annual Leveraging Factor	0.4%
--------------------------	------

NETWORK ADJUSTMENT FACTOR

This adjustment reflects changes with respect to the differences in network providers, contractual provider reimbursement rates, the degree of medical management for MVP versus other carriers, gatekeeper versus no gatekeeper, and referral versus open access. For those accounts enrolled in MVP, this factor will primarily represent differences in provider contractual arrangements. If the experience is coming from another carrier, the adjustment may reflect all of the items above. MVP will make every effort to develop actuarial adjustments that properly determine the appropriate factor to reflect the expected experience of the group.

The development of such a factor will be documented in the underwriter's group file and will be made available to in Insurance Department's actuaries and/or examiners on request.

BENEFIT ADJUSTMENT FACTOR

The purpose of the benefit adjustment is to reflect any difference between the benefits inherent in the group's historical claims experience period and the group's expected benefit plan for the prospective benefit period. This includes medical benefits and pharmacy benefits.

Based on filed manual rates, the underwriter will determine the value of the benefit adjustment factor by analyzing the actuarial equivalent difference in benefits. As it relates to a new group having experience from another carrier, the underwriter will use their best efforts to match up prior benefits to a currently filed benefit to determine the actuarial equivalent difference in benefits. In some cases, this may require interpolating between two manual rates, extrapolating from the filed manual rates, using other sources such as the Milliman USA guidelines, or other internal pricing models.

Other adjustments in this category may include benefit mandates. That is, mandated benefits that will be included in the future benefits, but not reflected in the group's experience.

The development of such a factor will be documented in the underwriter's group file and will be made available to in Insurance Department's actuaries and/or examiners on request.

PHARMACY REBATE FACTOR

Pharmacy rebates are received periodically. The pharmacy rebate factor of 0.67 is used to account for this reduction in pharmacy costs and reflects MVP's estimated pharmacy rebates received for 2019 dates of service. This reduction will only apply if the paid pharmacy claims do not already reflect pharmacy rebates. In the case where the employer group is not a MVP group, the underwriter will determine if the claims data provided includes or excludes rebates from the other carrier.

PERIOD WEIGHT

Period Weight is determined by the underwriter. The underwriters follow a general protocol for deriving the weights to apply for the Period Weight portion of the experience rating formula. Most groups are rated using 12 months of historical data and therefore, the period weights are not applicable. For the smaller of the large groups, the underwriter will consider extending the historical look back to 24 months if the data is available in order to provide a more stable block of data from which to do the rating. In these cases, the underwriter will generally give an 80% weight to the most recent 12 months of data and a 20% weight to the prior period of data. These weights may vary and could be 50% / 50% if the underwriter feels more weight should be given to the older data. This may be the case if the current 12 months are exceptionally higher or lower than the prior period.

CREDIBILITY WEIGHT

Based on MVP's product guidelines for offering a prospective experience rate, an employer must have (or project) a minimum of 100 eligible employees for the proposed rating period. However, consistent with industry rating practices, smaller sized experience rated groups should not be considered as producing 100% credible claims information. To protect the employer from significant rate fluctuation from year to year, MVP will be applying a credibility weight to the group's claim experience.

In determining a group's quoted rate, a weight will be given to the group's claims experience based on the number of member months in the experience period. The complement of the weight will be applied to the manual rate. The blended rate is one that will be quoted to the employer group. Below are the base credibility weightings:

Member Month Range	Credibility Factor
0 to 599	0%
600 to 2,400	20%
2,401 to 3,700	30%
3,701 to 4,900	40%
4,901 to 6,100	50%
6,101 to 7,300	60%
7,301 to 8,500	70%
8,501 to 9,700	80%
9,701 to 12,200	90%
12,201 and over	100%

These experience credibility weightings can be adjusted downward based on the underwriter's judgment in the following circumstances:

The employer group has provided less than 12 months of incurred claims data or data is not provided for all services or employees – Generally, a minimum of one full calendar year of incurred claims data for all populations and covered services included in the quote is desired to underwrite a case. In the event less than 12 months of data is available, the underwriter can adjust the credibility table downward, not to be less than 0%.

The employer group has had membership change by 50% or more since the experience period – With a significant membership change, the historical claims experience may no longer represent the group's current population. If the membership has changed by more than 50% from the experience period to the rating period, the underwriter may override the table above to reduce credibility downward, not to be less than 0%.

The most recent experience data provided is too old – Generally, from the mid-point of the experience period to the mid-point of the rating period should not be older than 24 months. If the more recent period of data is older than 24 months, the underwriter may adjust the credibility table downward, not to be less than 0%.

MVP may also make an upward adjustment to the table if the group has a favorable group risk assessment. The credibility percentage will never exceed 100%.

UNDERWRITING JUDGMENT/GROUP RISK ASSESSMENT

Underwriting judgment will be used by the underwriter in determining inputs to the rating formula or to modify the result depending on the circumstances of the case, the data available, or the quality of the available data.

Adjustments may be made due to items such as poor claim and enrollment experience data being presented for new groups, the group's claim trend being historically different than the averages, variability in claims experience, participation levels/group size changes, plan sponsor contribution levels, number of plan offerings, plan sponsor and covered population stability, and plan sponsor persistency. Adjustments may be both positive and negative, but will not be larger than 10% in either direction.

NETWORK ACCESS FEES AND OTHER FEES

MVP has a contracted network access fee with a rental network in the event a group has members that live outside of MVP's service area. The net access fee is \$0 PEPM for just those subscribers who live outside of the service area.

COVERED LIVES ASSESSMENT

This is a New York State assessment passed on to groups in premium rates. The following table reflects 2019 assessment rates which are assumed to be 5% higher than 2018 assessment rates.

Region	2019 Projected	
	Individual	Family
New York City	\$14.73	\$48.60
Long Island	\$5.23	\$17.27
Northern Metro	\$3.02	\$9.96
Northeastern	\$3.45	\$11.41
Utica/Watertown	\$0.72	\$2.40
Central	\$4.81	\$15.88
Rochester	\$9.01	\$29.72
Western	\$3.22	\$10.63

MVP will calculate the CLA with the group information that is available. For example, on a new business case, the number of single contracts by location may not be available. In that case, the CLA may have to be estimated based on the group's overall number single and family contracts and assume the same ratio exists in each region.

HCRA ASSESSMENT

This is another New York State assessment based on Hospital claims. A charge of 0.25% will be applied to the experience of new business quotes; this is consistent with the amount reflected in the manual portion of the rate.

RETENTION EXPENSES

Non-claim cost expenses must be added to the premium rates and can be per member per month (PMPM) charges, percent of paid claim charges, or percent of premium charges. The following tables reflect the retention loads:

Percent of Premium Retention:

General Administration = 8.9%

Bad Debt = 0.25%

Broker Loads = group specific

Percent of Premium Taxes/Fees:

Contribution to Surplus = 2.0%

VT Vaccine Assessment = 0.0%

ACA Insurer Tax = 0.0% for 2019 coverage dates; 1.0% for 2020 coverage dates

Percent of Paid Claim Surcharges:

VT Paid Claims Surcharge = 0.999%

PMPM Taxes/Assessments:

18 VSA 9374(h) Billback = \$0.91

EMPLOYER SPECIFIC PREMIUM RATES

The experience rating formula filing details the calculation of employer specific premium rates by using employer specific information. In the event the employer group cannot supply sufficient information to calculate employer specific conversion factors, the following community load ratios will be used:

- Single=1.0
- Double=2.0
- Family 2 tier=2.5
- Family 3 tier=2.6
- Family 4 tier= 2.8
- Parent Child 4 tier= 1.9

RETROSPECTIVE RATING

The risk charges for a group choosing to be rated retrospectively are outlined below:

(No DEFICIT CARRY FORWARD/80% SURPLUS REFUND FOR GROUPS 251+, 50% REFUND FOR GROUPS LESS THAN 251)

- Groups with 1,000+ enrolled subscribers = 1.020
- Groups with 251-999 enrolled subscribers = 1.020
- Groups with 51-250 enrolled subscribers = 1.020

MINIMUM PREMIUM FUNDING ARRANGMENTS

The following table shows the Claims Fluctuation Margin (CFM) available for groups of different sizes. The appropriate level of CFM will depend on the group’s size and risk assessment. Groups that are smaller with a higher risk assessment will have a higher CFM. Because of the risk involved with minimum premium funding, at the smaller group size, the underwriter will use judgment to determine if minimum premium funding is allowed.

Group Size	CFM
100-249	120%, 125%, or 130%
249-499	115%, 120%, or 125%
500-999	110%, 115%, or 120%
1,000+	105%, 110%, or 115%

NEW BUSINESS DISCOUNT

Due to the variances in information available for use in rating prospects, MVP is introducing the following additional adjustments to be used in developing new business proposals. The discount will apply to currently insured accounts that will offer MVP on a total replacement basis and have non-Medicare retiree enrollment of less than 5% of the total group enrollment.

Rate reduction of 5.0% will be applied if group meets the following criteria:

- *Demographic Factor <=1.10
- *Participation >70% of total employees being offered coverage
- *Employer Contribution > =50% of single rate of richest plan to all plans/tiers
- *Employer Deductible Funding not greater than 70% of the In-Network Deductible
- *One carrier prior 2 years
- *For accounts with <100 enrolled contracts quoted without claims data, documented incumbent Carrier Initial Renewal <12% (not from a rate cap)

Rate reduction of 8.0% will be applied if group meets the above list in addition to the following:

- *Employer Deductible Funding not greater than 50% of the In-Network Deductible
- *Enrollment decline of less than 15% in past 12 months
- *One carrier for prior 3 years

Discount Recovery:

Year 1 Discount	Year 2 Discount	Year 3 Discount
5.0%	3.5%	2.0%
8.0%	6.0%	4.0%

Employer groups will be required to provide documentation showing the criteria are met or sign an affidavit supporting the statement.

ACTUARIAL CERTIFICATION

I believe the rating factors described herein are consistent with industry norms, follows sound actuarial and underwriting principals, and the rating factors used and documented in the Experience Rating Addendum are reasonable relative to MVP's book of business and industry norms.

I have reviewed the provisions of Vermont Insurance Law. It is my opinion that this rating formula complies with the requirements of those provisions.
